Multi-Agent Systems and Agent-Based Simulation Sep 16 2021 Fifteen papers were presented at the first workshop on Multi-Agent Systems and Agent-Based Simulation held as part of the Agents World conference in Paris, July 4-- 6, 1998. The workshop was designed to bring together two developing communities: the multi-agent systems researchers who were the core participants at Agents World, and social scientists interested in using MAS as a research tool. Most of the social sciences were represented, with contributions touching on sociology, management science, economics, psychology, environmental science, ecology, and linguistics. The workshop was organised in association with SimSoc, an informal group of social scientists who have arranged an irregular series of influential workshops on using simulation in the social sciences beginning in 1992. While the papers were quite heterogeneous in substantive domain and in their disciplinary origins, there were several themes which recurred during the workshop. One of these was considered in more depth in a round table discussion led by Jim Doran at the end of the workshop on 'Representing cognition for social simulation', which addressed the issue of whether and how cognition should be modelled. Quite divergent views were expressed, with some participants denying that individual cognition needed to be modelled at all, and others arguing that cognition must be at the centre of social simulation.

Chasing the Cup Jun 25 2022 Jimmy Spithill is arguably one of the world's greatest skippers: the youngest and double winner of the America's Cup, the oceanic version of Formula 1; winner of the Sydney Hobart; multiple world champion in match and fleet racing... the list goes on. And on a day off he'll paddleboard 32 miles through Hawaiian double overhead waves. What goes on inside the head of this extremely focused man who is a true pioneer in the game called sailing? Here he tells his rags-to-riches story of fierce determination, court cases, seasickness, crashed boats and cars, alcohol, the greatest comeback ever in sporting history and the dramatic 2017 America's Cup defence. All of it contributed to turning a quiet, bullied, water-loving blue-collar redhead born in Sydney into one of sailing's biggest rockstars. Far from the official media-trained account so often found in the closed-off world of the America's Cup, Jimmy's open, honest style gives us a rare insight into what goes on inside the head of a man at the top of his game. Winging It Oct 29 2022 "The design and tactical battles that led to the most exciting America's Cup in history are laid out in meticulous detail in *Winging It: Oracle Team USA's Incredible Comeback to Defend The America's Cup*. Written by three veteran sailing journalists, *Winging It* provides an insider's look at the professional sailing business and the America's Cup, from how the 72-foot cats became the boat of choice —

one early requirement: They had to be able to be disassembled and transported in standard shipping containers — to the design modifications Oracle made in the later stages of the series to bounce back from an 8:1 deficit and retain the Cup (not much besides some minor tinkering with the rudder)." -Forbes "Whether you are a casual fan or a die-hard America's Cup follower, you're likely to enjoy *Winging It*. The three authors—all accredited journalists who spent many, many hours in the America's Cup Media Center—will take you from the origins of the America's Cup in 1851 all the way through Oracle Team USA's incredible comeback in San Francisco in September 2013." -CupExperience.com "*Winging It* holds a place on my bookshelf that is within easy reach. It has become the go-to book on the 34th America's Cup as a means of quickly checking a fact, or time sequence or some aspect of the Cup that has become a little fuzzy even after this short passage of time. It should have a place in everyone's laptop kitbag, either as a quick read in a spare moment, or as a serious reference." -Sail-World.com A miracle on the water Millions of sailing enthusiasts and casual fans alike watched the America's Cup in awe as the ORACLE TEAM USA trailing one point to New Zealand's eight, was first to the finish line in eight consecutive races. This miracle triumph left many wondering "How did they do it?" The answers come together in *Winging It*, with insights from naval architects and builders on their radical boat designs, the consequences of racing these untested boats, and explanations of how the foils and wingsails—rarely seen on boats before—work. The book explores the impact of events that led up to the Cup, including how a sudden capsized threw the entire event into doubt before the 2013 America's Cup ultimately delivered an epic finale. Top sailors share their stories, including the victorious Jimmy Spithill on USA 17 and the shockingly defeated ETNZ skipper Dean Barker. This is the story of an historic win that goes beyond the emotions of the day to explain how the many months of innovation, research, trials, and failures helped secure the Cup in the final race on September 25.
