Deadly Predators Jan 28 2020 National Geographic Primary Readers is a high-interest series of beginning reading books that have been developed in consultation with education experts. The books pair magnificent National Geographic photographs with lively text by skilled children's book authors across four reading levels. Level 3: Becoming independent Best suited to kids who are ready for complex sentences and more challenging vocabulary, but still draw on occasional support from adults. They are ideal for readers of Purple and Gold books. Come face-to-face with sharks, wolves, tigers, and many more predators in this gripping book in the National Geographic Kids Reader series. Amazing animal photos will wow kids as they discover how predators hunt, raise their young, and contribute to the food chain. This level 3 reader is written in easy-to-grasp text and will help kids understand who rules in the wild!

[Poisonous Snakes](#) Mar 22 2022 There are more than 250 kinds of poisonous snakes, and this illustrated book tells where they live, what they eat, and how they behave. It also reveals which snakes pose no danger to humans, how snakes are "milked," how anti-venom is made, and what to do if you're bitten.

King Cobras Aug 23 2019 There are several legless reptiles that crawl rather than walk, the

most common of these are snakes. Most snake species are nonvenomous, but there are also some that have deadly venom. Cobras are species of venomous snakes that are commonly called the hooded snake or the snake with a kapel; this account is likely taken because of its similarity to a chapel with a bell tower that has an enchanting appearance. When a cobra is disturbed, it usually rears up and spreads its neck as a display of a threat. King Cobras are everyone's favorite cobra. Not only are they the largest venomous snake in the world, but they are also without a doubt the most royal of the cobras. There is more that you can learn about this peculiar snake. This book will give you information about why these regal snakes are very venomous, even though they don't have high quality venom. What other food do they prey on that is unlike the rest? How they give birth to their young. And what it is like being a snake. Included in this book is a set of more than 20 descriptive photos to heighten the reader's understanding of their defenselessness as a crawling animal, their cunning skill while moving around, their first defense when frightened or threatened, and how they strike when all other options have been exhausted.

Slither, Snake! Dec 19 2021 National Geographic Primary Readers is a high-interest series of beginning reading books that have been developed in consultation with education experts.
