HAPM Component Life Manual 29 2022 This publication breaks new ground. It is the first document to provide extensive life-span assessments (for insurance purposes) for a wide range of building components which are classified within the concept of quality specifications. A further benefit is that it does not seek to be prescriptive. It indicates 'benchmarks' against which new or differing specifications can be assessed, in that sense it is both robust and flexible.

Gravel Roads Jul 02 2020 The purpose of this manual is to provide clear and helpful information on maintaining gravel roads. Very little technical help is available to small agencies that are responsible for managing these roads. Gravel road maintenance has traditionally been "more of an art than a science" and very few formal standards exist. This manual contains guidelines to help answer questions that arise concerning gravel road maintenance such as: What is enough surface cover? What is too much? What causes corrugation? The information is as nontechnical as possible without sacrificing clear guidelines and instructions on how to do the job right.
