Adolescent Literacy in the Academic Disciplines Nov 25 2021 From leading authorities in both adolescent literacy and content-area teaching, this book addresses the particular challenges of literacy learning in each of the major academic disciplines. Chapters focus on how to help students successfully engage with texts and ideas in English/literature, science, math, history, and arts classrooms. The book shows that while general strategies

for reading informational texts are essential, they are not enough—students also need to learn processing strategies that are quite specific to each subject and its typical tasks or problems. Vignettes from exemplary classrooms illustrate research-based ways to build content-area knowledge while targeting essential reading and writing skills.

Oxford Readings in Ovid Oct 01 2019

No other ancient poet has had such a hold on the imagination of readers as Ovid. Through the centuries, artists, writers, and poets have found in his work inspiration for new creative endeavours. This anthology of twenty of the most influential papers published in the last thirty years represents the broad range of critical and scholarly approaches to Ovid's work. The entire range of his poetry, from the Amores to the Epistles from the Black Sea, is discussed by some of the leading scholars of Latin poetry, employing, critical methods ranging from philology to contemporary literary theory. In an introductory essay, Peter Knox surveys Ovidian scholarship over this period and locates the

assembled papers within recent critical trends. Taken together, the articles in this collection offer the interested reader, whether experienced scholar or novice, an entrée into the current critical discourse on Ovid, who is at once one of the most accessible authors of classical antiquity and one of the least understood.

The Student's Companion to Latin Authors Aug 03 2022

DigiCat Publishing presents to you this special edition of "The Student's Companion to Latin Authors" by George Middleton, Thomas Ross Mills. DigiCat Publishing considers every written word to be a legacy of humankind. Every DigiCat book has been carefully reproduced for republishing in a new modern format. The books are available in print, as well as ebooks. DigiCat hopes you will treat this work with the acknowledgment and passion it deserves as a classic of world literature.

Transforming Talk into Text—Argument Writing, Inquiry, and Discussion, Grades 6-12 Oct 25 2021

Author Thomas McCann invites readers to rethink their approach to teaching writing by capitalizing on students' instinctive desire to talk. Drawing on extensive classroom research, he shows teachers how to craft class discussions that build students' skills of analysis, problem-solving, and argumentation as a means of improving student writing. McCann demonstrates how authentic discussions immerse learners in practices that become important when they write. Chapters feature

portraits of teachers at work, including transcripts that reveal patterns of talk across a set of lessons. Interviews with the teachers and samples of student writing afford readers a deeper understanding of process. Students also report on how classroom discussions supported their effort to produce persuasive, argument-driven essays. Book Features: A focus on "the thinking behind the practice," as opposed to a collection of lesson ideas. Connections to important elements from the Common Core State Standards, especially arguments writing. Examples of students at work with examples of the writing that emerges from their discussions. Portraits of skilled teachers as they promote inquiry and sequence and facilitate discussions. Appendices with problem-based scenarios, interview questions for students and teachers, samples of debatable cases in the news, and more. "In this important book, Tom McCann has given us not only the admonition to change, but the details about what effective change must be and what it looks like, evidence that it works effectively, and details about how to bring it to pass." —From the Foreword by George Hillocks, Jr., Professor Emeritus, Department of English, University of Chicago. "For a professional book to have an impact on the field, it needs to address a perceived need. Writing arguments for Common Core performance assessments is a HUGE need right now that this book helps address." —Carol Jago,

associate director, California Reading and Literature Project, UCLA.

Introducing the IB Diploma Programme Jun 01 2022

Schools wishing to introduce the IB diploma programme are faced with major investment in terms of time, effort and money in order to become authorised. This manual is a resource for schools already offering the diploma, as well as for prospective diploma schools. *The Classical Tradition* Jul 30 2019 Collects alphabetically arranged essays on how classical tradition has shaped popular culture, government, mathematics, medicine, and drama.

Writing, Violence, and the Military Aug 30 2019 Writing,

Violence, and the Military takes representations of reading and writing in Eighteenth Dynasty Egypt (ca. 1550-1295 BCE) as its point of departure, asking how patrons of art conceptualized literacy and how in turn they positioned themselves with respect to it. Exploring statuary and tomb art through the prism of self-representation and group formation, it makes three claims. Firstly, that the elite of this period held a variety of notions regarding literacy, among which violence and memory are most prominent. Secondly, that among the Eighteenth Dynasty elite, literacy found its strongest advocates among men whose careers brought them to engage with the military, either as military officials or as civil administrators who accompanied the army beyond the borders of Egypt. Finally, that Haremhab - the General in Chief who later ascended the throne - voiced unique views regarding literacy that arose from his career as an elite military official, and thus from his social world. Consequently, images of reading and writing allow us to study literacy with regard to those who commissioned them, and to consider these patrons' roles in changing conceptualizations. Throughout their different formulations, these representations call for a discussion on literacy in relation to self-representation and to art's role in society. They also invite us to reconsider our own approach to literacy and its significance in ancient times.

The Better Writing Breakthrough Oct 05 2022

Every teacher knows the challenge of trying to engage reluctant readers and struggling writers—students whose typical response to a writing prompt is a few sentence fragments scribbled on a sheet of paper followed by an elaborate shrug of the shoulders. The best way to engage less confident readers and writers is to give them something powerful to think about. The Discourse and Writing Cycle explores writing as a means to focus student thinking, fuel deeper learning, and build complex understanding in English, social studies, math, and science. This field-tested approach from well-respected experts Eleanor Dougherty, Laura Billings, and Terry Roberts is designed for use in grades 4-12. The book explores the three interrelated sequences of the cycle—the Discourse Sequence, the Transition to Writing Sequence, and the Writing Sequence—and includes classroom examples and sample lesson plans from across the content areas. The cycle will inspire you as a teacher and help you to inspire your students to write with confidence and competence. "How often we dim or extinguish the creative sparks that can come from good writing! William Butler Yeats proclaimed that 'Education is not the filling of a pail, but the

lighting of a fire.' This book lights the fire for the teaching of writing." —John Hattie, author of the Visible Learning books

Joseph Scaliger: Textual criticism and exegesis Jan 04 2020 This book describes the later life of Joseph Scaliger (1540-1609), the most original scholar of the late Renaissance. It concentrates on his efforts to date the main events of ancient and medieval history, a study that required him to use both astronomical data and philological methods. Volume I of this study was published in 1983, and received wide critical attention.

Bulletin of the United States National Museum Jan 16 2021

Politics and Big Data Apr 30 2022 The importance of social media as a way to monitor an electoral campaign is well established. Day-by-day, hour-by-hour evaluation of the evolution of online ideas and opinion allows observers and scholars to monitor trends and momentum in public opinion

well before traditional polls. However, there are difficulties in recording and analyzing often brief, unverified comments while the unequal age, gender, social and racial representation among social media users can produce inaccurate forecasts of final polls. Reviewing the different techniques employed using social media to nowcast and forecast elections, this book assesses its achievements and limitations while presenting a new technique of "sentiment analysis" to improve upon them. The authors carry out a meta-analysis of the existing literature to show the conditions under which social media-based electoral forecasts prove most accurate while new case studies from France, the United States and Italy demonstrate how much more accurate "sentiment analysis" can prove.
