Russian Motor Vehicles Jul 10 2020 There has been nothing published outside of Russia concerning the activities of its motor industry, by 1937 the Soviets had become the largest producers of motor vehicles in Europe, albeit with the help of Henry Ford The author decided to concentrate on the work of the pioneers in Czarist Russia, for their efforts were more diverse than those of their counterparts in the Soviet era. However, one Soviet motor car which was an indigenous product has been included to illustrate how the industry might have evolved if Henry Ford had not been approached. This is a comprehensive overview of all facets of vehicle production from the early days to the final demise of the Soviet Union. All the manufacturers of motor vehicles, certain accessories, military machines, and even aero engines are recorded in this unique book.

Dune Buggy Handbook Nov 01 2019 Here is an introduction to the whole cult of the dune buggy, from its earliest beginnings as a crude off-road vehicle in the 1920s, to the explosion of glassfibre-bodied and VW-based fun cars that became the cult transport of teenagers everywhere in the 1960s and 1970s. With histories, production details, dates and identification tips for over 70 US and UK buggies, this book will help identify the many marques that have been produced over the years. Using period photographs and archive material, combined with amazing contemporary photography, the book is a visual feast, and also contains sections on buggies and celebrities for those that want to spot pop stars, TV hosts and racing drivers posing with period vehicles.

Youth Development in Identity Societies Apr 30 2022 This book explores the causes and consequences of the contradictions in young people's lives stemming from the affluence-purpose paradox: a lack of purpose-in-life among many of those living in the most affluent societies in human history. This paradox is endemic to identity societies where people experience a choice-contingent life course, and is examined using an interdisciplinary approach—largely with an integration of developmental psychology and sociology, but also using historical, anthropological, economic, and political perspectives. The transition to adulthood is now commonly a prolonged process, with young people facing a number of psychological challenges and sociological obstacles in their identity formation. Challenges include difficulties in making prudent choices about goals. Obstacles involve cross-pressures in the wider society as well as in educational institutions. Consequently, many youth experience their education as alienating and stressful rather than as an opportunity for personal development. Those without a sense of purpose have more difficulties with their identity formation that can produce symptoms of anxiety and depression. The current student mental health crisis is examined in this context. An additional challenge is an ambiguously defined adulthood. Young people who are confused about appropriate adult roles often value hedonistic activities rooted in narcissism and materialism rather than in more fulfilling long-term goals. Conversely, those who are agentic in their personal development can thrive in adulthood, especially when they combine agency with generativity. This book ends with a series of recommendations for researchers and policy makers to help youth cope with the affluence-purpose paradox.

André Lefebvre, and the Cars He Created at Voisin and Citroën Oct 13 2020 Together with his colleagues at Citroën, Andre Lefebvre created the TrACTION Avant (1934), the TUB (1939) – Citroën's first front wheel drive utility van that was succeeded by the H and HY vans (1947) – the Deux Chevaux (1948), and, last but not least, the DS (1955). From 1923 to 1931 Lefebvre also designed several highly original and outstanding competition cars and record-breaking automobiles for Voisin. He even drove some these cars in races and record attempts. It is obvious that during his 16 years with Gabriel Voisin he was very much influenced by the ideas of this illustrious aviation pioneer and car manufacturer. The experience gained during that period gave him the self-confidence to persuade his successive bosses at Citroën that his unorthodox approach to automobile design was what the company needed; first he convinced André Citroën, later Pierre Michelin, then Pierre-Jules Boulanger, and finally Robert Puiseux and Pierre Bercot. His oeuvre for Citroën alone earns him a place of honour among the great automobile designers of the past century. The fact that most present-day cars still carry the DNA of his design philosophy makes him stand out above other automotive pioneers and innovators. That is why it is amazing that so little is known about this fascinating and brilliant engineer. This book was written in order to remedy that, and to pay tribute to André Lefebvre: the passionate pioneer who left car enthusiasts around the world such an important heritage.

The Porsche 924 Carrera Mar 18 2021 The 924 Carrera was a homologation model built to qualify the 924 model to race in Group 4. One of the great supercars of the 1980s, the 924 Carrera was considered by many to have better handling characteristics than Porsche's flagship 911. The book features interviews with many of those involved with the car at the time together with race stories, statistics, and a unique exposé of component failures during racing.

A Guide to Treatments that Work Mar 06 2020 Much about this third edition of A Guide to Treatments That Work remains as it was in the first and second editions. Like its predecessors, this edition offers detailed evaluative reviews of current research on empirically supported treatments, written in most instances by clinical psychologists and psychiatrists who are major contributors to that literature. Similarly, the standards by which the authors were asked to evaluate the methodological rigor of the research on treatments have also remained the same. As before, they provide information on the quality of the research on treatment efficacy and effectiveness that is reviewed.

Mustang Special Editions Sep 23 2021 When Ford rolled out the Mustang in April 1964 it was an instant hit. Even with its immense popularity it didn't stop Ford Corporate, zone managers, and dealerships from taking it an extra step further. Just two short months later, the first special-edition Mustang debuted at the Indianapolis 500 tasked with pacing the race, and it's been full throttle ever since. This book examines more than 300 special-edition Mustangs from 1964 through today. British Lorries of the 1960s Aug 11 2020 British commercial manufacturers played a prime role in boosting Britain's economy during the 1960s, especially as many vehicles were exported worldwide. British lorries were, therefore, considered as being the workhorses of the world, performing a wide range of duties from heavy haulage to general goods delivery. This highly visual study of British lorries of the 1960s captures in 120 illustrations this often understated but very necessary work, which was undertaken day and night, 365 days a year. The images, many contemporary colour and black and white, include some delightful publicity items in addition to covering the heritage and preservation scenes. The comprehensive text reveals much about the marques that were everyday names, along with information about Britain's road haulage and commercial vehicle industries. Malcolm Bobbitt is the author of some thirty automotive books and is a member of the Guild of Motoring Writers and the Society of Automotive Historians. This book will rekindle many memories and serve as a reminder of the important role British commercial vehicles played during the 1960s.
