NASA Apollo 11 Nov 01 2019 On July 20, 1969, US astronaut Neil Armstrong became the first man to walk on the moon. The Apollo 11 mission that carried him and his two fellow astronauts on their epic journey marked the successful culmination of a quest that, ironically, had begun in Nazi Germany thirty years before. This is the story of the Apollo 11 mission and the 'space hardware' that made it all possible. Author Chris Riley looks at the evolution and design of the mighty Saturn V rocket, the Command and Service Modules, and the Lunar Module. He also describes the space suits worn by the crew, with their special life support systems. Launch procedures are described, 'flying' the Saturn V, navigation, course correction 'burns', orbital rendezvous techniques, flying the LEM, moon landing, moon walk, take-off from the moon, and earth re-entry procedure. Includes performance data, fuels, biographies of Armstrong, Aldrin and Collins, Gene Kranz and Werner von Braun. Detailed appendices cover all of the Apollo missions, with full details of crews, spacecraft names and logos, mission priorities, moon landing sites, and the Lunar Rover.

Klingon Bird-of-Prey Haynes Manual Sep 11 2020 An all-new Star Trek technical manual of the legendary Klingon Bird of Prey, presented in the world-renowned Haynes Manual format! The Bird-of-Prey is the classic Klingon starship—a tough raiding and scouting vessel that has served at the heart of the Klingon Defense Force for more than a hundred years. Life on board is harsh and brutal, with any sign of weakness leading to a challenge to the death. The ship itself is stripped back and lean, with everything designed for a single purpose—war. This Haynes Manual traces the origins of a Bird-of-Prey from the moment it is commissioned by

one of the Great Houses and constructed at the shipyards of the Klingon Naval Academy. It then proceeds to examine General Martok's famous ship the I.K.S. Rotarran in unprecedented detail. Featuring a stunning cutaway drawing and, for the first time ever, detailed deck plans and incredible new computer-generated artwork, the Haynes Bird-of-Prey Manual is a technical tour of the ship's systems, from the bridge and engineering rooms to the disruptors, torpedo launcher, and the all-important cloaking device. In addition, the Manual provides a unique insight into life on board a Klingon ship and the Rotarran's glorious history in the Dominion War. This Haynes Manual is fully authorized by CBS. All the new artwork has been designed by STAR TREK: THE NEXT GENERATION and STAR TREK: VOYAGER's senior illustrator Rick Sternbach, who is the world's leading expert on STAR TREK technology, with CG renders produced by STAR TREK VFX artist Adam 'Mojo' Lebowitz.
