The Leave-No-Crumbs Camping Cookbook Oct 03 2019 Imagine this: You're at a campsite 10,000 feet up in the Third Mono Creek Recess of the high Sierras. You have no refrigerator, no food processor, no non-stick cookware, no measuring spoons, no pepper mill, no sea salt. How are you going to cook a meal that is imaginative, delightful, and delicious? That's what *The Leave-No-Crumbs Camping Cookbook* is all about. Rick Greenspan and Hal Kahn show anyone who loves the outdoors how to make homemade pizza, braid challah, wrap poached trout in a sushi roll, and even make dumplings for Chinese dim sum at their campsite. Campers who have never cooked anything more complicated than s'mores might feel uncertain about tackling chocolate mousse in the wild, but Greenspan and Kahn have three decades of experience teaching camp-out cooking. "We've taught people who could barely boil water," they say. And they are reassuring about trailside mishaps. If your grilled trout falls into the fire, take it out, brush off the ash, and rename the dish Cajun Blackened Trout. If the eggs break in their plastic container, make a dinner of crêpes, huevos rancheros, and a cake. "The point of wilderness cooking is to have fun," say Greenspan and Kahn, "not worry if the Académie Française is looking over your shoulder." You'll find recipes for soups and stews; fruit, vegetable, and tofu dishes; pilafs, risottos, and polenta; pasta, noodles, and dumplings; sauces and schmeers (that's Yiddish for spreads); pancakes, crêpes, and soufflés; pizza and quiche. An entire chapter is devoted to trout, and the

book even includes a recipe for chocolate cake. There are instructions and tips for all sorts of of cooking techniques, including dehydrating, baking in coals or on a camping stove, grilling, frying, and steaming. And several pages are devoted to trip planning: how much food to bring, what to look for in a camp stove, how long you can expect your cooking fuel to last. This book is perfect for car campers, backpackers, bikers, canoeists, tail-gaters, and day picnickers who want good food to be part of the outdoor experience

Treatment of Eating Disorders Jul 24 2021 Eating disorders (EDs) affect at least 11 million people in the United States each year and spread across age, race, ethnicity and socio-economic class. While professional literature on the subject has grown a great deal in the past 30 years, it tends to be exclusively research-based and lacking expert clinical commentary on treatment. This volume focuses on just such commentary, with chapters authored by both expert clinicians and researchers. Core issues such as assessment and diagnosis, the correlation between EDs and weight and nutrition, and medical/psychiatric management are discussed, as are the underrepresented issues of treatment differences based on gender and culture, the applications of neuroscience, EDNOS, comorbid psychiatric disorders and the impact of psychiatric medications. This volume uniquely bridges the gap between theoretical findings and actual practice, borrowing a bench-to-bedside approach from medical research. Includes real-world clinical findings that will improve the level of care readers can provide, consolidated in one place Underrepresented issues such as gender, culture, EDNOS and comorbidity are covered in full Represents outstanding scholarship, with each chapter written by an expert in the topic area
