Law of Love, The Nov 23 2021 Meditations on the sources of formation in Christian approach to law, its application to contemporary living, and how our approach to the law should set us free, not bind us up. A positive contribution to the present and lively debate about the tension between Christian liberty and obedience.

Governance in the Extractive Industries Jan 14 2021 Greater understanding of the forms and consequences of investment and disinvestment in the extractive industries is required as a result of capitalist expansion, recent declines in global commodity prices, and claims that extractive sector projects, especially in the global south, are poverty reduction projects. This book explores emergent forms of governance in mining and extractive industry projects around the world. Chapters examine efforts to govern extractive activities across multiple political scales, through intermediaries, instruments, technologies, discourses, and infrastructures. The contributions analyse how multiple micro-processes of rule reverberate through societies to shape the material conditions of everyday life but also politics, social relations, and subjectivities in extractive economies. Detailed case studies are included from Africa (Chad, Nigeria, Rwanda, and São Tomé and Príncipe), Latin America (Bolivia, Ecuador, and Peru), and the UN Climate Conference.

Doctor's Notes Aug 28 2019 'I'm in the wrong job,' I said to our practice nurse, 'I should definitely have been a detective.' For BBC Breakfast's Dr Rosemary Leonard, a day in her GP's surgery is full of unexplained ailments and mysteries to be solved. From questions of paternity to apparently drug-resistant symptoms, these mysteries can sometimes take a while to get to the bottom of, especially when they are of a more intimate nature. In her second book about life in her London surgery, Dr Rosemary recalls some of her most puzzling cases... and their rather surprising explanations.

Out of Sight Nov 11 2020 OUT OF SIGHT was made into the highly-acclaimed movie starring George Clooney and Jennifer Lopez. Jack Foley was busting out of Florida's Glades Prison when he ran head-on into Karen Sisco with a shotgun. Suddenly the world-class gentleman felon was sharing a cramped car trunk with a disarmed federal marshal - whose Chanel suit cost more than the take from Foley's last bank job - and the chemistry was

working overtime. Here's a lady Jack could fall for in a big way, if she weren't a dedicated representative of the law that he breaks for a living. And as soon as she escapes, he's already missing her. But there are some seriously bad men and a major score waiting for Jack in Motown. And there's a good chance that when his path crosses Karen's again, she's going to be there for business, not pleasure.

Profits before People? Apr 28 2022 The pharmaceutical industry has come under intense criticism in recent years. One poll found that 70% of the sample agreed that drug companies put profits ahead of people. Is this perception accurate? Have drug companies traded ethics for profits and placed people at risk? In *Profits before People?* Leonard J. Weber exposes pharmaceutical industry practices that have raised ethical concerns. Providing systematic ethical analysis and reflection, he discusses such practices as compensating physicians for serving as speakers or consultants, providing incentives to physicians to enroll patients as subjects in clinical research, and advertising prescription drugs to the public through the mass media. Weber's critique of the industry is stern. While acknowledging that new industry guidelines are promising, he finds much room for improvement in the way drug companies market their products. Yet Weber makes a strong case that profits and ethics can coexist and that they are not mutually exclusive. In an effort to understand the proper place of commerce in disseminating information about new drugs, the book aims to clarify basic responsibilities and to help identify sound ethical practices. It recognizes that ethics and law are not the same, that "having a right" is different from "doing the right thing," and that taking ethics seriously means recognizing that the law does not answer all questions about what is right. Weber points the way to more demanding standards and better practices that might begin to restore confidence in the drug industry.

Corporate and White Collar Crime Dec 25 2021 This timely collection contains contemporary case studies and critical analyses by leading writers in the study of white collar corporate crime. It makes an invaluable contribution to the 'criminology of the corporation' - Professor Hazel Croall, Glasgow Caledonian University *Corporate and White Collar Crime* is an essential overview of this diverse subject area and encourages students to develop a broad understanding of the topic. Aimed primarily at undergraduate and postgraduate students in Criminology, Criminal Justice and Business and Management Studies, the book will cross-over into many other disciplines including Law and Social Policy. "This is an innovative and multidisciplinary analysis of corporate and white collar crime that is both theoretically and empirically rich. The text serves as a poignant reminder why research involving the powerful must be a central part of criminological inquiry and why this book is essential reading." Professor Reece Walters, The Open University "Again and again, pension funds are pillaged, investors fleeced, commuters killed, workers maimed, and communities poisoned. Why is it that so few of these acts are defined as crimes, and why is it that, even when they are, prosecution is so rarely effective? *Corporate Crime and White Collar Crime* addresses these very questions through its rigorous, well-developed analysis and its wide ranging empirical focus - on Europe, North America, Asia and beyond. The book can help all of us to re-examine our understanding of the nature of crime and of criminals, and to reassess the costs as well as the benefits of our current economic, political and social order." Professor Frank Pearce, Queen's University, Canada

The Jurisprudence of Lord Hoffmann Jan 26 2022 Lord Leonard Hoffmann remains one of the most important and influential English jurists. Born in South Africa, he came to England as a Rhodes Scholar to study law at the University of Oxford. After graduating from the Bachelor of Civil Law as Vinerian Scholar, he was elected Stowell Civil Law Fellow of University College. There followed an extremely distinguished judicial career, including 14 years as a member of the Judicial Committee of the House of Lords (from 1995 to 2009). In 2009, Lord Hoffmann returned to the Oxford Law Faculty as a Visiting Professor. In this volume, current and past colleagues of Lord Hoffmann from the University of Oxford examine different aspects of his jurisprudence in diverse areas of private and public law. The contributions are testament to the clarity and creativity of his judicial and extra-judicial writings, to his enduring influence and extraordinary intellectual breadth, and to the respect and affection in which he is held.

Lying to Ourselves Oct 23 2021 One of the hallmarks of a true profession is its ability to assess and regulate itself, especially with respect to adherence to its foundational ethos. Such self-examination is difficult and often

causes discomfort within the profession. Nonetheless, it is absolutely necessary to enable members of the profession to render the service for which the profession exists. U.S. military professionals have never shied away from this responsibility, and they do not today, as evidenced by this riveting monograph. Discussing dishonesty in the Army profession is a topic that will undoubtedly make many readers uneasy. It is, however, a concern that must be addressed to better the Army profession. Through extensive discussions with officers and thorough and sound analysis, Drs. Leonard Wong and Stephen Gerras make a compelling argument for the Army to introspectively examine how it might be inadvertently encouraging the very behavior it deems unacceptable.

The Picture of Health Dec 13 2020 Film and literature have long been mined for interesting examples and case studies in order to teach biomedical ethics to students. This volume presents a collection of about 80 very brief, accessible essays written by international experts from medicine, social sciences, and the humanities, all of whom have experience using film in their teaching of medical ethics. Each essay focuses on a single scene and the ethical issues it raises, and the volume editors have provided strict guidelines for what each essay must do, while also allowing for some creative freedom. While some of the films are obvious candidates with medical themes -- "Million Dollar Baby", "The Diving Bell and the Butterfly" -- some are novel choices, such as "Pan's Labyrinth" or "As Good as it Gets". The book will contain several general introductory chapters to major sections, and a complete filmography and cross-index at the end of the book where readers can look up individual films or ethical issues.

Raylan Jun 06 2020 The star of JUSTIFIED returns in a stunning new novel from 'the greatest crime writer who ever lived' [Dennis Lehane]. US Marshal Raylan Givens, star of the series JUSTIFIED, and protagonist of RIDING THE RAP, PRONTO and the story 'Fire in the Hole', is back in action, this time with a federal warrant to serve on a dope dealer named Angel Arenas, a man 'born in the U.S. but a hundred percent of him Hispanic'. The state troopers are impressed when the marshal struts into the convict's hotel room without drawing his gun, but Raylan soon finds that Angel's already been the victim of another crime, one that's way bigger than a few pot plants, and clearly the work of a professional ... RAYLAN shows Elmore Leonard at the height of his powers, as we follow one of his favourite protagonists through a series of adventures with unlikely villains. As ever, the work is filled with unexpected twists and the most vibrant, crackling dialogue currently available in the English language.

Robot Ethics 2.0 Sep 29 2019 The robot population is rising on Earth and other planets. (Mars is inhabited entirely by robots.) As robots slip into more domains of human life--from the operating room to the bedroom--they take on our morally important tasks and decisions, as well as create new risks from psychological to physical. This makes it all the more urgent to study their ethical, legal, and policy impacts. To help the robotics industry and broader society, we need to not only press ahead on a wide range of issues, but also identify new ones emerging as quickly as the field is evolving. For instance, where military robots had received much attention in the past (and are still controversial today), this volume looks toward autonomous cars here as an important case study that cuts across diverse issues, from liability to psychology to trust and more. And because robotics feeds into and is fed by AI, the Internet of Things, and other cognate fields, robot ethics must also reach into those domains, too. Expanding these discussions also means listening to new voices; robot ethics is no longer the concern of a handful of scholars. Experts from different academic disciplines and geographical areas are now playing vital roles in shaping ethical, legal, and policy discussions worldwide. So, for a more complete study, the editors of this volume look beyond the usual suspects for the latest thinking. Many of the views as represented in this cutting-edge volume are provocative--but also what we need to push forward in unfamiliar territory.

Professional Ethics and Social Responsibility Dec 01 2019 Edmund Burke: Modernity, Politics, and Aesthetics examines the philosophy of Burke in view of its contribution to our understanding of modernity. Stephen K. White argues that Burke shows us how modernity engenders an implicit forgetfulness of human finitude. White illustrates this theme by showing how Burke's political thought, his judgment of the modern system of morality and policy, and its taste for a false sublime are structured by his aesthetics.

Research ethics in the real world May 18 2021 Research ethics and integrity are growing in importance as academics face increasing pressure to win grants and publish, and universities promote themselves in the competitive HE market. She argues that knowledge of both ethical approaches is helpful for researchers working in either paradigm. Students, academics, and research ethics experts from around the world contribute real-world perspectives on navigating and managing ethics in practice. Research Ethics in the Real World provides guidance for quantitative, qualitative, and mixed-methods researchers from all disciplines about how to act ethically throughout your research work. Public Health Ethics: Cases Spanning the Globe Feb 24 2022 This Open Access book highlights the ethical issues and dilemmas that arise in the practice of public health. It is also a tool to support instruction, debate, and dialogue regarding public health ethics. Although the practice of public health has always included consideration of ethical issues, the field of public health ethics as a discipline is a relatively new and emerging area. There are few practical training resources for public health practitioners, especially resources which include discussion of realistic cases which are likely to arise in the practice of public health. This work discusses these issues on a case to case basis and helps create awareness and understanding of the ethics of public health care. The main audience for the casebook is public health practitioners, including front-line workers, field epidemiology trainers and trainees, managers, planners, and decision makers who have an interest in learning about how to integrate ethical analysis into their day to day public health practice. The casebook is also useful to schools of public health and public health students as well as to academic ethicists who can use the book to teach public health ethics and distinguish it from clinical and research ethics.

Music, Business and Peacebuilding Feb 01 2020 Business schools are placing more emphasis on the role of business in society. Top business school accreditors are shifting to mandating that schools teach their students about the social impact of business, including AACSB standards to require the incorporation of business impact on society into all elements of accredited institutions. Researchers are also increasingly focused on issues related to sustainability, but in particular to business and peace as a field. A strong strain of scholarship argues that ethics is nurtured by emotions and through aesthetic quests for moral excellence. The arts (and music as shown specifically in this book) can be a resource to nudge positive emotions in the direction toward ethical behavior and, logically, then toward peace. Business provides a model for positive interactions that not only foster long-term successful business but also incrementally influences society. This book provides an opportunity for integration and recognition of how music (and other art forms) can further encourage business toward the direction of peace while business provides a platform for the dissemination and modeling of the positive capabilities of music toward the aims of peace in the world today. The primary market for this book is the academic audience. Unlike many other academic books, however, the interdisciplinary nature of the book allows for multiple academic audiences. Thus, this book reaches into schools of music, business, political science, film studies, sports and society studies, the humanities, ethics and, of course, peace studies.

Giving Voice to Values Jul 08 2020 How can you effectively stand up for your values when pressured by your boss, customers, or shareholders to do the opposite? Drawing on actual business experiences as well as on social science research, Babson College business educator and consultant Mary Gentile challenges the assumptions about business ethics at companies and business schools. She gives business leaders, managers, and students the tools not just to recognize what is right, but also to ensure that the right things happen. The book is inspired by a program Gentile launched at the Aspen Institute with Yale School of Management, and now housed at Babson College, with pilot programs in over one hundred schools and organizations, including INSEAD and MIT Sloan School of Management. She explains why past attempts at preparing business leaders to act ethically too often failed, arguing that the issue isn't distinguishing what is right or wrong, but knowing how to act on your values despite opposing pressure. Through research-based advice, practical exercises, and scripts for

handling a wide range of ethical dilemmas, Gentile empowers business leaders with the skills to voice and act on their values, and align their professional path with their principles. Giving Voice to Values is an engaging, innovative, and useful guide that is essential reading for anyone in business.

Ethics and the Legal Profession Jul 20 2021 Beneficial for law or philosophy students, or practicing lawyers, Ethics and the Legal Profession includes articles by eminent philosophers and lawyers that explore moral problems in legal practice. The text is divided into six sections, each dealing with an important issue: The History and Organization of the Profession in the United States; The Moral Critique of Professionalism; The Adversary System; Conflict of Interest and Professional Judgment; Perjury and Confidentiality; and Making Legal Services Available. Combining in-depth case studies with careful analysis, the editors help students and professionals distinguish between moral and technical judgment, become clearer about the meaning of moral discourse in the workplace, and better appreciate the higher callings of their profession. Raising provocative questions about the rationale and limits of professional responsibility, this text provides insights into the ethics of the legal profession at a time when technology, globalization, and the changing economics of lawyering are reshaping the profession of law in ways still hard to predict.

Philosophy Apr 04 2020 This collection of essays was the last work planned by Ayn Rand before her death in 1982. In it, she summarizes her view of philosophy and deals with a broad spectrum of topics. According to Ayn Rand, the choice we make is not whether to have a philosophy, but which one to have: rational, conscious, and therefore practical; or contradictory, unidentified, and ultimately lethal. Written with all the clarity and eloquence that have placed Ayn Rand's Objectivist philosophy in the mainstream of American thought, these essays range over such basic issues as education, morality, censorship, and inflation to prove that philosophy is the fundamental force in all our lives.

Real American Ethics Aug 21 2021 America is a wonderful and magnificent country that affords its citizens the broadest freedoms and the greatest prosperity in the world. But it also has its share of warts. It is embroiled in a war that many of its citizens consider unjust and even illegal. It continues to ravage the natural environment and ignore poverty both at home and abroad, and its culture is increasingly driven by materialism and consumerism. But America, for better or for worse, is still a nation that we have built. So why then, asks Albert Borgmann in this most timely and urgent work, are we failing to take responsibility for it? In Real American Ethics, Borgmann asks us to reevaluate our role in the making of American values. Taking his cue from Winston Churchill - who once observed that we shape our buildings, and then our buildings shape us - Borgmann considers the power of our most enduring institutions and the condition of our present moral makeup to propose inspired new ways in which we, as ordinary citizens, can act to improve our country. This, he shows, includes everything from where we choose to live and what we spend our money on to daunting tasks like the reshaping of our cities - habits and actions that can guide us to more accomplished and virtuous lives. Using prose that is easy and direct throughout, Borgmann's position is grounded neither by conservative nor liberal ideology, but in his understanding that he is a devoted citizen among many. In an age in which the blame game is the only game in town, this patriotic book is an eloquent reminder of the political strength we all wield when we work together.

The Heart of a Business Ethic Sep 09 2020 Over the past several years a cascade of corporate scandals have erupted. Savings and provisions for retirement have shrunk drastically. Jobs have been lost. One of the world's largest and best-known accounting firms is gone. Ordinary people have been hurt and they have lost confidence in business leaders. The on-going public debate over business ethics and corporate reform points to one common conclusion: Things cannot be corrected by simply adding more laws and new rules. The solution will come from high moral leadership. The Heart of A Business Ethic is based on the Hansen-Wessner Lectureship Series established by the ServiceMaster Foundation to consider the source of moral authority and ethical behavior in business. The eight lectures in this series were presented at major universities in the U.S. and Britain, and

brought together some of the most distinguished business experts of our time. What they have to say is important for business teachers and students, and business leaders at every level. The scandals at Enron, Tyco and others have generated many books on business ethics, but none offer the expertise or breadth of thinking that this volume does. The Heart of A Business Ethic is useful to professors, students, and practitioners who not only want to understand what has happened, but who also want to think through the basis for a new standard of morality in business.
