Competitive Transformation of the Postal and Delivery Sector Feb 07 2021 Competitive Transformation of the Postal and Delivery Sector is an indispensable source of information and analysis on the current state of the postal and delivery sector. It offers current insights of leading researchers and practitioners into strategy and regulation as well as the economics of this sector. Issues addressed include national and international perspectives, financial viability, the universal service obligation, regulation, competition, entry, the role of scale and scope economies, the nature and role of cost and demand analysis in postal service, productivity, interaction of law and economics, human resources, transition and reform issues. The papers in the book were selected from the papers presented at the 11th Conference on Postal and Delivery Economics, Toledo, Spain, June 4-7, 2003.

[U. S. Postal Service](#) Aug 25 2022 The U.S. Postal Service (USPS) is facing significant financial problems as mail volume is declining, 4.5% in FY 2008 and 11% projected for FY 2009. USPS lost \$2.8 billion in FY 2008 and projects a \$6.4 billion loss in FY 2009 (possibly more if it cannot cut \$5.9 billion in costs). As one way to cut costs, USPS is trying to improve the efficiency of mail delivery, which generates close to one-third of USPS's \$78 billion in expenses. Recognizing the sizable impact of delivery on USPS's finances and operations, this report addresses: (1) how USPS monitors delivery efficiency; (2) characteristics of delivery units that affect their efficiency; and (3) the status and results of USPS's actions to improve delivery efficiency, in particular USPS's Flats Sequencing System. [Improving the Efficiency of Postal Services Procurement in the Public Sector](#) Sep 26 2022 This NAO report contains case studies which examine the use of postal services in five organisations, relating to two large government departments (HM Revenue and Customs and the Department for Work and Pensions), two executive agencies (National Savings and Investments and the Driver and Vehicle Licensing Agency), and a private sector financial services organisation (the RBS Group, which covers brands such as the Royal Bank of Scotland, NatWest Bank, Coutts, Direct Line and Tesco Personal Finance). Two accompanying documents are available separately: the main report (HCP 946-I, ISBN 0102937303) which examines how public sector organisations can become more effective in their procurement and management of postal services; and guidance which sets out examples of good practice across public and private sectors (HCP 946-III, ISBN 0102937362).

Stirring the Pot Jun 18 2019 The term "domesticity" may bring to mind cooking, cleaning, and tranquil evenings at home. During the last few decades, however, American domesticity has become ever more politicized as third-wave feminists, conservative critics, and others debate the very meaning of home and family. Despite this new wave of debate, the home, particularly the kitchen, is comfortable territory for the consolidation of issues of gender, space, marketplace, community, and technology in twentieth century literature. This work looks closely at a wide variety of southern domestic literature, focusing particularly on the role of the family kitchen as a driving force in the narratives of Ellen Glasgow, Eudora Welty, Lee Smith, and Toni Morrison. Topics include the overtones of isolation and the almost claustrophobic third-person narration of Glasgow's Virginia and Life and Gabriella; the communal kitchen and its role in defining the sexual discourse of Welty's Delta Wedding; the unification of national railway lines and its consequences for the traditional Appalachian kitchen in Smith's Oral History and Fair and Tender Ladies; and the lasting effects of slavery on the "haunted domesticity" of the African-American kitchen in Morrison's Jazz, Paradise, and Love.

[Space Fostering African Societies](#) Sep 21 2019 This book provides detailed insights into how space and its applications are, and can be, used to support the development of the full range and diversity of African societies, as encapsulated in the African Union's Agenda 2063. Like previous books in the "Southern Space Studies" series, it focuses on the role of space in supporting the UN Sustainable Development Goals in Africa, but it covers an even more extensive array of relevant and timely topics addressing all facets of African development. It demonstrates that, while great achievements have been made in recent years in terms of economic and social development, which has lifted many of Africa's people out of poverty, there is still much that needs to be done to fulfill the basic needs of Africa's citizens and afford them the dignity they deserve: to this end space is already being employed in diverse fields of human endeavor to serve Africa's goals for its future, but there is much room for further incorporation of space systems and data. Providing a comprehensive overview of the role space is playing in achieving Africa's developmental aspirations, the book is of great interest to both students and professionals in fields such as space studies, international relations, governance, social and rural development, and many others.

[Intranet Performance Management](#) Feb 25 2020 To avoid serious bottlenecks, components of the Internet and of intranets-such as servers, browsers, and the access networks-must be properly designed, implemented, managed, and monitored. Beginning with the basics, Intranet Performance Management sets forth the standards, methods, and tools that can simplify and unify systems and network management, avoid the seemingly inherent problems associated with them, and contain costs. In this book, world renowned expert Kornel Terplan addresses: Proactive server, browser, and access network monitoring Managing and authoring home page content Traffic management and load balancing in the access networks Reviewing and evaluating usage statistics using log files These tasks-essential to the success of an intranet-require the active and diligent work of the management team. Effective performance of these tasks allows for the use of inexpensive browsers, facilitates education, and improves Internet culture and scalability.

[The Contribution of the Postal and Delivery Sector](#) Jun 11 2021 This book addresses major issues facing postal and delivery services throughout the world. Worldwide, there is currently a considerable amount of interest in postal and delivery economics. The industry is in a state of near crisis and drastic change is needed. The European Commission and member States are still wrestling with the problem of how to implement entry liberalization into postal markets, how to address digital competition, and how to maintain the universal service obligation (USO). The Postal Accountability and Enhancement Act of 2006 in the U.S. has perhaps created and exacerbated the problems faced by USPS. Post Offices (POs) have been slow to address the threat of electronic competition. On the other hand, e-commerce presents opportunities for POs to expand their presence in parcel delivery and perhaps help finance or redefine the USO. A major aim of this book is to address strategies POs can use to reinvent themselves for the digital age. This book compiles original essays by prominent researchers in the field, which will be selected and edited from papers presented at the 25th Conference on Postal and Delivery Economics held in Barcelona, Spain, May 24-27, 2017. That conference, and this volume, commemorates the memory of Michael Crew who organized twenty-four prior conferences and co-edited previous conference volumes. This book is a useful tool not only for graduate students and professors, but also for postal administrations, consulting firms, and Federal Government departments.

How the Post Office Created America Jan 18 2022 A masterful history of a long underappreciated institution, How the Post Office Created America examines the surprising role of the postal service in our nation's political, social, economic, and physical development. The founders established the post office before they had even signed the Declaration of Independence, and for a very long time, it was the U.S. government's largest and most important endeavor—indeed, it was the government for most citizens. This was no conventional mail network but the central nervous system of the new body politic, designed to bind thirteen quarrelsome colonies into the United States by delivering news about public affairs to every citizen—a radical idea that appalled Europe's great powers. America's uniquely democratic post powerfully shaped its lively, argumentative culture of uncensored ideas and opinions and made it the world's information and communications superpower with astonishing speed. Winifred Gallagher presents the history of the post office as America's own story, told from a fresh perspective over more than two centuries. The mandate to deliver the mail—then "the media"—imposed the federal footprint on vast, often contested parts of the continent and transformed a wilderness into a social landscape of post roads and villages centered on post offices. The post was the catalyst of the nation's transportation grid, from the stagecoach lines to the airlines, and the lifeline of the great migration from the Atlantic to the Pacific. It enabled America to shift from an agrarian to an industrial economy and to develop the publishing industry, the consumer culture, and the political party system. Still one of the country's two major civilian employers, the post was the first to hire women, African Americans, and other minorities for positions in public life. Starved by two world wars and the Great Depression, confronted with the country's increasingly anti-institutional mind-set, and struggling with its doubled mail volume, the post stumbled badly in the turbulent 1960s. Distracted by the ensuing modernization of its traditional services, however, it failed to transition from paper mail to email, which prescient observers saw as its logical next step. Now the post office is at a crossroads. Before deciding its future, Americans should understand what this grand yet overlooked institution has accomplished since 1775 and consider what it should and could contribute in the twenty-first century. Gallagher argues that now, more than ever before, the imperiled post office deserves this effort, because just as the founders anticipated, it created forward-looking, communication-oriented, idea-driven America.

[Multi-Modal Competition and the Future of Mail](#) Sep 14 2021 This compilation of original papers selected from the 19th Conference on Postal and Delivery Economics and authored by an international cast of economists, lawyers, regulators and industry practitioners addresses perhaps the major problem that has ever faced the postal sector – electronic competition from information and communication technologies (ICT). This has increased significantly over the last few years with a consequent serious drop in mail volume. All postal services have been hard hit by ICT, but probably the hardest hit is the United States Postal Service, which has lost almost a quarter of its mail volume since 2007.

The loss of mail volume has a devastating effect on scale economies, which now work against post offices, forcing up their unit costs. Strategies to stem the loss in volume include non-linear pricing or volume discounts, increased efficiency and the development of new products. This loss of mail volume from ICT is one of a number of current problems addressed in this volume. The Universal Service Obligation (USO) continues to be a leading issue and concern that ICT undermines postal services' ability to finance the USO is discussed. The importance of measuring and forecasting demand and costs take on even greater importance as ICT undermines the foundations of the postal business. This thought provoking book brings to bear new analyses of the most serious threat post offices have ever faced and raises fundamental questions as to the future of mail. Multi-Modal Competition and the Future of Mail is an ideal resource for students, researchers in regulation and competition law, postal administrations, policy makers, consulting firms and regulatory bodies.
