Israeli F-15 Eagle Units in Combat Mar 20 2021 Post-Yom Kippur War, Israel purchased the F-15 Eagle, the then world's best air-to-air fighter, in an effort to prevent another surprise attack from the air. For the first time in its history the IDF/AF operated a fighter that was a full generation ahead of opposing interceptors in the region. The first 'kill' F-15 Baz (Buzzard) arrived in Israel in 1976 and soon proved its worth in combat. Israeli Baz pilots were credited with 12.5 kills between 1979 and 1981, with 33 victories following during the June 1982 Lebanon War. Despite substantial combat, no Israeli F-15 has ever been lost to enemy action. In the 1990s the US government supplied the IDF/AF with the F-15I Ra'am (Thunder) to fulfill the long-range surface-to-surface missile mission post-Desert Storm. From A to I, the extremely capable, and combat-tested, Israeli F-15 force will continue to deter potential enemies well into the foreseeable future. This book examines the history and development of these units.

Vietnam War Army Helicopter Nose Art - Volume 2 May 22 2021 Historian John D. Marshall wrote, "History is shaped by the memories of those who witness it, and the intentions of those who record it." Vietnam veteran Hiawatha Oakes wrote, "I can't thank you enough for your efforts in obtaining a photo of my H-21, the 'Blue Angel', and having it in your book. My family calls your book, "lost pieces of treasures found." These two quotations represent all that is relevant to the author in history gathering: the hard work and its rewards. Here in Volume 2 one will find equally astonishing photos on par with Volume 1, together with some self-help and researched info for sure to tease and delight the aficionado or veteran to unknown degrees. Besides the 165 images, there are search aids for locating one's former in-country Army helicopter. A listing is available of American sites where Huey & Cobra rides are available. The Army museum in Alabama offers a listing they have compiled of two-dozen recommended Huey photo-books. A tabulation of 300 AH-1 Cobra war survivors, their former units, and present location. Also offered is a database of 500 newly found in-country Army helicopter names. There's a little something for everyone.

Hidden Warbirds Jan 18 2021 "If you only have room in your collection for one book on WWII-era warbird wreck histories and recoveries, then it should be this one. Nicholas Veronico's thorough research and clear, concise writing style make Hidden Warbirds a fascinating joy to read." - Alan Griffith, author of Consolidated Mess: The Illustrated Guide to Nose-turreted B-24 Production Variants in USAAF Combat Service Aviation historian Nicholas A. Veronico has been investigating and writing about aircraft wrecks for many years. His website, wreckchasing.com, is the go-to source for enthusiasts who want to know more about how to locate vintage airplane wrecks and then tell their stories. In this engaging new book, Veronico explores the romantic era of World War II Warbirds and the stories of some of its most famous wrecks, including the "Swamp Ghost" (a B-17E which crashed in New Guinea in the early days of World War II and which was only recently recovered), and "Glacier Girl" (a P-38, part of "The Lost Squadron," which crashed in a large ice sheet in Greenland in 1942). Throughout, Veronico provides a history of the aircraft, as well as the unique story behind each discovery and recovery with ample illustrations. Hidden Warbirds is aviation history at its best.

Israeli F-4 Phantom II Aces Dec 17 2020 The American manufactured F-4 Phantom II was used by the Israelis in air-to-ground missions, as an attack aircraft, and air-to-air missions as a fighter. Despite performing both roles with equal success the Israeli reliance on the Mirage III and Nesher delta fighters meant that the F-4 was used most regularly in its air-to-ground role. The kill total of the Israeli F-4 community was, consequently, a modest 116.5; significantly lower

than that of other Israeli aircraft types in service between 1969 and 1982. A handful of aces were, nevertheless, created and, using first hand accounts, this unique book tells their stories. Many F-4 pilots had previously flown the Mirage III but most of the navigators were either inexperienced flying school graduates or had been transferred from transport aircraft. The decision to create such teams may have appeared an odd one and it certainly led to a number of interesting experiences but proved, ultimately, to be so successful that by 2010 the Israeli air force will have more two-seat combat aircraft than single-seat fighters. The F-4 experience was, therefore, crucial to moulding the future of the Israeli air force.

ANZACs Oct 03 2019 An updated and extended version of the now out-of-print CW volume on ANZAC Spitfire pilots, this new book in the highly acclaimed "Classic Warbirds" series tells the stories of ten Australian and New Zealand pilots in WW2, flying Spitfires and Hurricanes based in Britain, the Middle East and the CBI theater. Based on interviews with the pilots and their written memoirs, this is a fascinating look at the personalities inside the fighter planes. Profusely illustrated with photos (many from the pilots' own collections) and Malcolm Laird's superb artwork, this is essential reading for students of WW2 air warfare, enthusiasts, and modelers. Malcolm Laird has been producing books, decal sheets and model kits for many years, and his "Ventura" products are highly regarded all over the world. Co-author Steve Mackenzie is an aviation historian.

Israeli Mirage III and Nesher Aces Jul 24 2021 Israeli delta fighters pilots have been credited with almost 300 kills between 1966 and 1974, and dozens of them became aces. The Israeli aerial kill exchange rate and overall air-to-air performance was phenomenal. Although the Israeli pilots were flying Mach 2 fighters, they lacked any modern radar equipment and their MiG-21 flying

opponents should have had a performance edge over them. This book details their most significant engagements, many of which were essentially World War 2 style dogfights fought with jet aircraft. Because neither side had the combat edge to disengage at will most engagements were a life and death struggle and the introduction of air-to-air missiles and the Israeli Nesher was to prove decisive in this theatre.

Israeli Air Force, 1947-1960 May 02 2022 The writing of this book, the first in-depth and fully detailed research about the early years of the Chel Ha'Avir - from the light-plane days to the supersonic fighters received roughly ten years later - is the culmination of a long research period by the author. Research that was made harder by the tight - but understandable and respected - security measures involving Israel's Forces. An exceptional source of information has been the help provided by many Chel Ha'Avir veterans who fought in the early days during 1948/1949, and those who helped establish a viable air force in 1949-1956 in spite of tight budgets, obsolescent equipment and lack of experience, and also those who fought in Sinai in late 1956, establishing the seeds for its future role as the airborne shield of Israel. As the reader will discover, the beginnings were extremely hard, and the Chel Ha'Avir had to face unfriendly attitudes from both the United States and the United Kingdom, which took place while many people - civilian and military - were dying in the newborn Hebrew state. But in observing that official policies do not always reflect the citizenship's feelings, most of the colorful band of foreign volunteers that helped the Chel Ha'Avir - and the other defense forces - to resist, fight back and win, came from those countries. These foreign volunteers, mostly with combat experience in World War II, provided a core in which many highly talented young Israelis learned fast. One thing was certain, then and now; Israel exists because of the resolute people that live in this small country, both civilian and military, but above all because of the Chel Ha'Avir which in the following years would be proclaimed the most combat experienced air force in the world.

F-105 Thunderchiefs Nov 15 2020 One of the U.S. Air Force's most important fighter bombers, the F-105 Thunderchief was in operation for almost thirty years. It played a key role in the Vietnam War. This book details the histories of the 103 F-105s that are displayed around the world. Part One of the work summarizes the 29 years of F-105 operations, focusing on events, aircraft configurations, units and bases. The individual histories and photographs of each surviving F-105 from its production to its static display are contained in Part Two. Appendices provide a mapped-out, state by state "Thunderchief Tour," and the fate, by serial number, of all 117 of the F-105s that survived their operational career only to end up in scrap yards.

The United States and the Vietnam War, 1954-1975 Apr 20 2021 The United States in the Vietnam War, 1954-1975 is an invaluable reference guide to the costly and controversial war the U.S. waged in Vietnam, over the course of five presidential administrations. Focusing not only on the conflict in Southeast Asia, but also on the tumult the war inspired on the domestic front, Louis Peake provides an authoritative guide to the wide range of media available on the U.S. involvement in Vietnam. From collections of art work and poetry about the soldiering experience, to journalistic accounts of battles, and military training films, the entries consistently provide clear and concise descriptions, allowing the reader to easily identify the value of any particular resource. With revised and updated annotations, and over 150 new entries, this second edition of *The United States in the Vietnam War, 1954-1975* is an invaluable reference tool for

researchers and students of the Vietnam War. Routledge Research Guides to American Military Studies provide concise, annotated bibliographies to the major areas and events in American military history. With the inclusion of brief critical annotations after each entry, the student and researcher can easily assess the utility of each bibliographic source and evaluate the abundance of resources available with ease and efficiency. Comprehensive, concise, and current—Routledge Research Guides to American Military Studies are an essential research tool for any historian.

The Organization and Order of Battle of Militaries in World War II Jul 12 2020 There are numerous "order of battle" books on the market. So what makes this one so special? Why should one decide on this particular book? Most "order of battle" books usually deal only at the division and corps level of a country's army. Most higher commands are not covered. This book deals with all the branches of a country's military, giving a breakdown of all the major echelons of command, from theater down to brigade, under each component (army groups, armies, corps, divisions, and brigades), and the equivalent command structure for the other military branches are included. Second, it attempts to give an overall command structure of the country's military, showing the central headquarters command structure as well as the major components (army groups, armies, corps, etc.). Third, most "order of battle" books list the commander and their dates of tenure. This book includes those but also lists their next duty assignments or where they went after leaving the post. One can literally trace a general officer's career through the upper echelons of command, making this completely different from all the other books on order of battle in the market.

Air War Over Vietnam Feb 28 2022 These books contain photographs of the Vietnam War. The focus is on various aspects of the air war following no strict chronology or subject line, but is aimed to give an overall impression of the conflict through this random selection. Volume 2 covers the operations between 1964 and 1968. The third volume contains photographs of the war as recorded by a variety of photographers who were lucky enough to be present at an interesting scene in the sky or on the ground. Volume 4 is a full-color pictorial survey of US air involvement during the war. The compiler hopes to convey the atmosphere of that difficult combat environment, as well as provide a general overview of the major aircraft types used in the war.

High Stakes Oct 15 2020 After the dust of World War II had settled, the military position of the UK was far from straightforward. It was of course allied to the USA and part of NATO, but it was at odds with the former in maintaining an Empire and the two nations also had competing oil interests in the Middle East. The UK's engagement in war after 1945 was thus a strange mixture ranging from homeland security through insular actions within the colonies or protectorates to preserve empire - to playing a major role in confronting the USSR. The types of active involvement of the RAF, Fleet Air Arm and Army Air Corps between 1945 and 1995 include the following, with examples. Maintaining Local Stability - Greece, Netherlands East Indies. Maintaining Empire - Malaya, Kenya. Defending Empire - Borneo. Defending Interests - Suez, Kuwait. Homeland Security - Northern Ireland, air defence. Confrontation - Berlin Airlift, Korea. Covert Action - Albania, strategic reconnaissance. Humanitarian and Peacekeeping- Jordan, Cyprus. Development of Deterrent - Bombs, bombers and missiles.
