The Archaeology of Human Bones Oct 11 2020 *The Archaeology of Human Bones* provides an up to date account of the analysis of human skeletal remains from archaeological sites, introducing students to the anatomy of bones and teeth and the nature of the burial record. Drawing from studies around the world, this book illustrates how the scientific study of human remains can shed light upon important archaeological and historical questions. This new edition reflects the latest developments in scientific techniques and their application to burial archaeology. Current scientific methods are explained, alongside a critical consideration of their strengths and weaknesses. The book has also been thoroughly revised to reflect changes in the ways in which scientific studies of human remains have influenced our understanding of the past, and has been updated to reflect developments in ethical debates that surround the treatment of human remains. There is now a separate chapter devoted to archaeological fieldwork on burial grounds, and the chapters on DNA and ethics have been completely rewritten. This edition of *The Archaeology of Human Bones* provides not only a more up to date but also a more comprehensive overview of this crucial area of archaeology. Written in a clear style with technical jargon kept to a minimum, it continues to be a key work for archaeology students.

Ancient Rome Apr 04 2020 "The editors of this book have gathered a group of internationally renowned scholars who have been working at the centre of recent archaeological developments in Rome. The result is an interconnected series of richly illustrated chapters, each exploring aspects of the archaeology of the ancient city and employing the latest research. These are organised both chronologically and thematically to examine Early and Archaic Rome, the Middle Republic, Augustus and the image of Rome, soldiery in Imperial Rome, the construction industry, feeding and watering the city, entertainment, living and dying, religions, late imperial Rome, and the innovative architecture of Roma Capitale. An appendix introduces the sources for ancient Rome, and a Research Bibliography presents over 1,700 titles for further study." -- Provided by publisher

The Archaeology of Space and Place in the West Feb 01 2020 "This book focuses on space and placemaking in the American West by historic communities and uses archaeological case studies for this evaluation. Archaeological narratives are often investigated and told through a specific cultural lens, and in the West, these are often a Euro-American lens. This project looks at historic sites from marginalized communities and attempts to investigate them without this preconceived dominant narrative. It points to the need to incorporate these narratives and recognize this is a different process for any community or culture in a specific geographical location"--

The Buried Aug 28 2019 A National Book Critics Circle Award Finalist "Extraordinary...Sensitive and perceptive, Mr. Hessler is a superb literary archaeologist, one who handles what he sees with a bit of wonder that he gets to watch the history of this grand city unfold, one day at a time." —Wall Street Journal From the acclaimed author of *River Town* and *Oracle Bones*, an intimate excavation of life in one of the world's oldest civilizations at a time of convulsive change Drawn by a fascination with Egypt's rich history and culture, Peter Hessler moved with his wife and twin daughters to Cairo in 2011. He wanted to learn Arabic, explore Cairo's neighborhoods, and visit the legendary archaeological digs of Upper Egypt. After his years of covering China for *The New Yorker*, friends warned him Egypt would be a much quieter place. But not long before he arrived, the Egyptian Arab Spring had begun, and now the country was in chaos. In the midst of the revolution, Hessler often traveled to digs at Amarna and Abydos, where locals live beside the tombs of kings and courtiers, a landscape that they call simply al-Madfunah: "the Buried." He and his wife set out to master Arabic, striking up a friendship with their instructor, a cynical political sophisticate. They also befriended Peter's translator, a gay man struggling to find happiness in Egypt's homophobic culture. A different kind of friendship was formed with the neighborhood garbage collector, an illiterate but highly perceptive man named Sayyid, whose access to the trash of Cairo would be its own kind of archaeological excavation. Hessler also met a family of Chinese small-business owners in the lingerie trade; their view of the country proved a bracing counterpoint to the West's conventional wisdom. Through the lives of these and other ordinary people in a time of tragedy and heartache, and through connections between contemporary Egypt and its ancient past, Hessler creates an astonishing portrait of a country and its people. What emerges is a book of uncompromising intelligence and humanity--the story of a land in which a weak state has collapsed but its underlying society remains in many ways painfully the same. A worthy successor to works like Rebecca West's *Black Lamb and Grey Falcon* and Bruce Chatwin's *The Songlines*, *The Buried* bids fair to be recognized as one of the great books of our time.

The Oxford Handbook of the Archaeology of Death and Burial Sep 09 2020 This Handbook reviews the state of mortuary archaeology and its practice with forty-four chapters focusing on the history of the discipline and its current scientific techniques and methods. Written by leading scholars in the field, it derives its examples and case studies from a wide range of time periods and geographical areas.

The Archaeology of Magic Jan 26 2022 In this book, C. Riley Augé provides a trailblazing archaeological study of magical practice and its relationship to gender in the Anglo-American culture of colonial New England.

The Archaeology of the Caucasus Aug 09 2020 This conspectus brings together in an accessible and systematic manner a dizzy array of archaeological cultures situated between several worlds.

Rubbish! Dec 13 2020 It is from the discards of former civilizations that archaeologists have reconstructed most of what we know about the past, and it is through their examination of today's garbage that William Rathje and Cullen Murphy inform us of our present. *Rubbish!* is their witty and erudite investigation into all aspects of the phenomenon of garbage. Rathje and Murphy show what the study of garbage tells us about a population's demographics and buying habits. Along the way, they dispel the common myths about our "garbage crisis"—about fast-food packaging and disposable diapers, about biodegradable garbage and the acceleration of the average family's garbage output. They also suggest methods for dealing with the garbage we do have.

The Archaeology of Time Oct 23 2021 It might seem obvious that time lies at the heart of archaeology, since archaeology is about the past. However, the issue of time is complicated and often problematic, and although we take it very much for granted, our understanding of time affects the way we do archaeology. This book is an introduction not just to the issues of chronology and dating, but time as a theoretical concept and how this is understood and employed in contemporary archaeology. It provides a full discussion of chronology and change, time and the nature of the archaeological record, and the perception of time and history in past societies. Drawing on a wide range of archaeological examples from a variety of regions and periods, *The Archaeology of Time* provides students with a crucial source book on one of the key themes of archaeology.

An Archaeology of the Cosmos May 06 2020 *An Archaeology of the Cosmos* seeks answers to two fundamental questions of humanity and human history. The first

question concerns that which some use as a defining element of humanity: religious beliefs. Why do so many people believe in supreme beings and holy spirits? The second question concerns changes in those beliefs. What causes beliefs to change? Using archaeological evidence gathered from ancient America, especially case material from the Great Plains and the pre-Columbian American Indian city of Cahokia, Timothy Pauketat explores the logical consequences of these two fundamental questions. Religious beliefs are not more resilient than other aspects of culture and society, and people are not the only causes of historical change. An Archaeology of the Cosmos examines the intimate association of agency and religion by studying how relationships between people, places, and things were bundled together and positioned in ways that constituted the fields of human experience. This rethinking theories of agency and religion provides readers with challenging and thought provoking conclusions that will lead them to reassess the way they approach the past.

The Archaeology of Refuge and Recourse Sep 21 2021 *The Archaeology of Refuge and Recourse* explores the dual practices of refuge and recourse among Indigenous peoples of California. From the eighteenth to the twentieth century, Indigenous Coast Miwok communities in California persisted throughout multiple waves of colonial intrusion. But to what ends? Applying theories of place and landscape, social memory, and mobility to the analysis of six archaeological sites, Tsim D. Schneider argues for a new direction in the archaeology of colonialism. This book offers insight about the critical and ongoing relationships Indigenous people maintained to their homelands despite colonization and systematic destruction of their cultural sites. Schneider is a citizen of the Federated Indians of Graton Rancheria, the sovereign and federally recognized tribe of Coast Miwok and Southern Pomo people whose ancestral homelands and homewaters are the central focus of *The Archaeology of Refuge and Recourse*. Viewing this colonial narrative from an Indigenous perspective, Schneider focuses on the nearly one quarter of Coast Miwok people who survived the missions and created outlets within and beyond colonial settlements to resist and endure colonialism. Fleeing these colonial missions and other establishments and taking refuge around the San Francisco Bay Area, Coast Miwok people sought to protect their identities by remaining connected to culturally and historically significant places. Mobility and a sense of place further enabled Coast Miwok people to find recourse and make decisions about their future through selective participation in colonial projects. In this book, Tsim D. Schneider argues that these distancing and familiarizing efforts contribute to the resilience of Coast Miwok communities and a sense of relevance and belonging to stolen lands and waters. Facing death, violence, and the pervading uncertainty of change, Indigenous people of the Marin Peninsula balanced the pull and persistence of place against the unknown possibilities of a dynamic colonial landscape and the forward-thinking required to survive. History, change, and the future can be read in the story of Coast Miwok people.

The Archaeology of Animals Nov 23 2021 Ever since the discovery of fossil remains of extinct animals associated with flint implements, bones and other animal remains have been providing invaluable information to the archaeologist. In the last 20 years many archaeologists and zoologists have taken to studying such "archaeofaunal" remains, and the science of "zoo-archaeology" has come into being. What was the nature of the environment in which our ancestors lived? In which season were sites occupied? When did our earliest ancestors start to hunt big game, and how efficient were they as hunters? Were early humans responsible for the extinction of so many species of large mammals 10-20,000 years ago? When, where and why were certain animals first domesticated? When did milking and horse-riding begin? Did the Romans influence our eating habits? What were sanitary conditions like in medieval England? And could the terrible pestilence which afflicted the English in the seventh century AD have been plague? These are some of the questions dealt with in this book. The book also describes the nature and development of bones and teeth, and some of the methods used in zoo-archaeology.

An Archaeology of Temperature Aug 21 2021 This work investigates the material culture of public temperatures in New York City. Numbers like temperature, while ubiquitous and indispensable to capitalized social relations, are often hidden away within urban infrastructures evading attention. This *Archaeology of Temperature* brings such numbers to light, interrogating how we construct them and how they construct us. Building on discussions in contemporary archaeology this book challenges the border between material and discursive culture, advocating for a novel conception of capitalism's artifacts. The artifacts examined within (temperatures) are instantaneous electric pulses, algorithmic outputs, and momentary fluctuations in mercury. The artifacts of the capitalized never sit still, operating at subatomic and solar scales. Temperatures, as numerical materials precariously straddling the colonially constructed nature-culture divide, exemplify the abstraction necessary to pursue the perpetually accelerating asymmetrical growth of wealth—a pursuit that engenders multiple environmental and economic calamities. An *Archaeology of Temperature* innovatively reimagines theory and method within contemporary archaeology. Equally, in plummeting the depths of temperature, this book offers indispensable contributions to science studies, urban geography, semiotics, the philosophy of materiality, the history of thermodynamics, heterodox economics, performative scholarship, and queer ecocriticism.

Archaeology of the Atlantic Northeast Dec 25 2021 The first comprehensive look at the archaeological history of the Atlantic Northeast, this book presents the archaeology of the region from the earliest Indigenous occupation to the first centuries of European occupation.

The Archaeology of the Dead May 30 2022 Henri Duda is Director of Research for CNRS at the University of Bordeaux. *The Archaeology of the Dead* is based on an intensive specialist course in burial archaeology given by Duda in Rome in November 2004. The primary aim of the project was to contribute to the development of common procedures for excavation, data collection and study of Roman cemeteries of the imperial period. Translated into English by Anna Maria Cipriani and John Pearce, this book looks at the way in which the analysis of skeletons can allow us to re-discover the lives of people who came before us and inform us of their view of death. Duda thoroughly examines the means at our disposal to allow the dead to speak, as well as identifying the pitfalls that may deceive us.

The Order of Things Mar 04 2020 With vast erudition, Foucault cuts across disciplines and reaches back into seventeenth century to show how classical systems of knowledge, which linked all of nature within a great chain of being and analogies between the stars in the heavens and the features in a human face, gave way to the modern sciences of biology, philology, and political economy. The result is nothing less than an archaeology of the sciences that unearths old patterns of meaning and reveals the shocking arbitrariness of our received truths. In the work that established him as the most important French thinker since Sartre, Michel Foucault offers startling evidence that "man"—man as a subject of scientific knowledge—is at best a recent invention, the result of a fundamental mutation in our culture.

Archaeology of the Night Nov 04 2022 How did ancient peoples experience, view, and portray the night? What was it like to live in the past when total nocturnal darkness was the norm? *Archaeology of the Night* explores the archaeology, anthropology, mythology, iconography, and epigraphy of nocturnal practices and questions the dominant models of daily ancient life. A diverse team of experienced scholars uses a variety of methods and resources to reconstruct how ancient peoples navigated the night and what their associated daily—and nightly—practices were. This collection challenges modern ideas and misconceptions regarding the night and what darkness and night symbolized in the ancient world, and it highlights the inherent research bias in favor of "daytime" archaeology. Numerous case studies from around the world (including Oman, Mesoamerica, Scandinavia, Rome, Great Zimbabwe, Indus Valley, Peru, and Cahokia) illuminate subversive, social, ritual, domestic, and work activities, such as witchcraft, ceremonies, feasting, sleeping, nocturnal agriculture, and much more. Were there artifacts particularly associated with the night? Authors investigate individuals and groups (both real and mythological) who share a special connection to nighttime life. Reconsidering the archaeological record, *Archaeology of the Night* views sites, artifacts, features, and cultures from a unique perspective. This book is relevant to anthropologists and archaeologists and also to scholars of human geography, history, astronomy, sensory studies, human biology, folklore, and mythology. Contributors: Susan Alt, Anthony F. Aveni, Jane Eva Baxter, Shadreck Chirikure, Minette Church, Jeremy D. Coltman, Margaret Conkey, Tom Dillehay, Christine C. The Archaeology of Darkness Oct 03 2022 Through time people have lived with darkness. Archaeology shows us that over the whole human journey people have sought out dark places, for burials, for votive deposition and sometimes for retreat or religious ritual away from the wider community. Thirteen papers explore Palaeolithic use of deep caves in Europe and the orientation of mortuary monuments in the Neolithic and Bronze Age. It examines how the senses are affected in caves and monuments that were used for ritual activities, from Bronze Age miners in Wales working in dangerous subterranean settings, to initiands in Italian caves, to a modern caver's experience of spending time in the one of the world's deepest caves in Russia. We see how darkness was and is viewed at northern latitudes where parts of the year are spent in eternal night, and in Easter Island where darkness provided communal refuge from the pervasive sun. We know that spending extended periods in darkness and silence can affect one physically, emotionally and spiritually. How did interactions between people and darkness affect individuals in the past and how were regarded by their communities? And how did this interaction transform places in the landscape? As the ever-increasing electrification of the planet steadily minimizes the amount of darkness in our lives, curiously, darkness is coming more into focus. This first collection of papers on the subject begins a conversation about the role of darkness in human experience through time.

The Archaeology of Ancient Arizona Sep 02 2022 Carved from cliffs and canyons, buried in desert rock and sand are pieces of the ancient past that beckon thousands of visitors every year to the American Southwest. Whether Montezuma Castle or a chunk of pottery, these traces of prehistory also bring archaeologists from all over the world, and their work gives us fresh insight and information on an almost day-to-day basis. Who hasn't dreamed of boarding a time machine for a trip into the past? This book invites us to step into a Hohokam village with its sounds of barking dogs, children's laughter, and the ever-present grinding of mano on metate to produce the daily bread. Here, too, readers will marvel at the skills of Clovis elephant hunters and touch the lives of other ancestral people known as

Mogollon, Anasazi, Sinagua, and Salado. Descriptions of long-ago people are balanced with tales about the archaeologists who have devoted their lives to learning more about "those who came before." Trekking through the desert with the famed Emil Haury, readers will stumble upon Ventana Cave, his "answer to a prayer." With amateur archaeologist Richard Wetherill, they will sense the peril of crossing the flooded San Juan River on the way to Chaco Canyon. Others profiled in the book are A. V. Kidder, Andrew Ellicott Douglass, Julian Hayden, Harold S. Gladwin, and many more names synonymous with the continuing saga of southwestern archaeology. This book is an open invitation to general readers to join in solving the great archaeological puzzles of this part of the world. Moreover, it is the only up-to-date summary of a field advancing so rapidly that much of the material is new even to professional archaeologists. Lively and fast paced, the book will appeal to anyone who finds magic in a broken bowl or pueblo wall touched by human hands hundreds of years ago. For all readers, these pages offer a sense of adventure, that "you are there" stir of excitement that comes only with making new discoveries about the distant past.

The Archaeology of the Holy Land Nov 11 2020 "In the heart of the ancient Near East (modern Middle East) and at a crossroads between once mighty powers such as Assyria to the east and Egypt to the south is a tiny piece of land -- roughly the size of New Jersey -- that is as contested as it is sacred. One cannot even name this territory without sparking controversy. Originally called Canaan after its early inhabitants (the Canaanites), it has since been known by various names. To Jews this is Eretz-Israel (the Land of Israel), the Promised Land described by the Hebrew Bible as flowing with milk and honey. To Christians it is the Holy Land where Jesus Christ -- the messiah or anointed one -- was born, preached, and offered himself as the ultimate sacrifice. Under the Greeks and Romans, it was the province of Judea, a name which hearkened back to the biblical kingdom of Judah. After the Bar-Kokhba revolt ended in 135 C.E., Hadrian renamed the province Syria-Palestina, reviving the memory of the long-vanished kingdom of Philistia. Under early Islamic rule the military district (jund) of Filastin was part of the province of Greater Syria (Arabic Bilad al-Sham). In this book, the term Palestine is used to denote the area encompassing the modern state of Israel, the Hashemite kingdom of Jordan, and the Palestinian territories"--

The Archaeology of Pineland Dec 01 2019 By the 1500s the Calusa Indians controlled all of southern Florida. Their archaeological sites dot the southwestern Florida Gulf coast, yet little has been known about them until recently. This book focuses on the site complex at Pineland, location of the second largest of the Calusa towns. It encompassed more than 100 acres, and was the beginning point of the remarkable Pine Island Canal. The research at Pineland is the first extensive study of any principal Calusa town and of the bountiful but dynamic environment that sustained these remarkable Native Floridians. The Archaeology of Pineland reports the results of a multi-year, interdisciplinary project. Focused mainly on 1700 years of Native American occupation, the book also provides new information about post-contact changes in culture and landscape. Abundantly illustrated, the book's 19 chapters include more than 400 figures. The book contains never-before-published information about the archaeology, history, and environment of Southwest Florida, and will be an essential reference work for future studies. It also stands as a detailed and tangible case study in historical ecology.

An Archaeology of Abundance Feb 12 2021 This volume focuses on the archaeology and historical ecology of a series of islands located off the Pacific Coast of Alta and Baja California, from the Channel Islands to Cedros Island.

The Classical Archaeology of Greece Sep 29 2019 Archaeologists do not discover the past but take the fragmentary remains which they recover and make something of them. Archaeology is a process of detection and supposition; this is what makes it so fascinating. However, the interpretations of archaeologists differ and change over time. They depend upon the amount of evidence available, the ideas and preconceptions of the archaeologist and their interests and aims. Michael Shanks's enlivening work is a guide to the discipline of classical archaeology and its objects. It assesses archaeology as a means of reconstructing ancient Greek society using the latest approaches of social archaeology. In addition, *The Classical Archaeology of Greece* outlines the history of the discipline and discusses why Classical Greece continues to fascinate us and why it has had such an impact on European civilization and identity.

The Archaeology of the Roman Economy Apr 16 2021 Kevin Greene shows how archaeology can help provide a more balanced view of the Roman economy by informing the classical historian about geographical areas and classes of society that received little attention from the largely aristocratic classical writers whose work survives.

The Archaeology of Ancient Israel Mar 16 2021 In this illustrated book, some of Israel's foremost archaeologists present a survey of early life in the land of the Bible, from the Neolithic era (eighth millennium BC) to the fall of Jerusalem and the destruction of the First Temple in 586 BC. Each chapter covers a particular era and includes a bibliography.

The Archaeology of Athens Apr 28 2022 The monuments of ancient Athens and Attica give eloquent testimony to the enduring legacy of Greek civilization. In this book, a leading authority on the archaeology of this area presents a survey of the monuments, first chronologically and then site by site, creating the definitive work on the subject. John M. Camp begins with a comprehensive narrative history of the monuments from the earliest times to the sixth century A.D. Drawing on literary and epigraphic evidence, including Plutarch's biographies, Pausanias's guidebook, and thousands of inscriptions, he discusses who built a given structure, when, and why. Camp presents dozens of passages in translation, allowing the reader easy access to the variety and richness of the ancient sources. In effect, this main part of the book provides an engrossing history of ancient Athens as recorded in its archaeological remains. The second section of the book offers in-depth discussions of individual sites in their physical context, including accounts of excavations in the modern era. Written in a clear and engaging style and lavishly illustrated, Camp's archaeological tour of Athens is certain to appeal not only to scholars and students but

Archaeology of Knowledge Aug 01 2022 Foucault's classic methodological statement.

An Archaeology of Land Ownership Jan 14 2021 Within archaeological studies, land tenure has been mainly studied from the viewpoint of ownership. A host of studies has argued about land ownership on the basis of the simple co-existence of artefacts on the landscape; other studies have tended to extrapolate land ownership from more indirect means. Particularly noteworthy is the tendency to portray land ownership as the driving force behind the emergence of social complexity, a primordial ingredient in the processes that led to the political and economic expansion of prehistoric societies. The association between people and land in all of these interpretive schemata is however less easy to detect analytically. Although various rubrics have been employed to identify such a connection -- most notable among them the concepts of 'cultures,' 'regions,' or even 'households' -- they take the links between land and people as a given and not as something that needs to be conceptually defined and empirically substantiated. *An Archaeology of Land Ownership* demonstrates that the relationship between people and land in the past is first and foremost an analytical issue, and one that calls for clarification not only at the level of definition, but also methodological applicability. Bringing together an international roster of specialists, the essays in this volume call attention to the processes by which links to land are established, the various forms that such links take and how they can change through time, as well as their importance in helping to forge or dilute an understanding of community at various circumstances.

The Archaeology of Childhood Jul 08 2020 The study of children and childhood in historical and prehistoric life is an overlooked area of study that Jane Baxter addresses in this brief book. Her timely contribution stresses the importance of studying children as active participants in past cultures, instead of regarding them mainly for their effect on adult life. Using the critical concepts of gender and socialization, she develops new theoretical and methodological approaches for the archaeological study of this large but invisible population. Baxter presents examples from the analysis of toys, miniatures, and other objects traditionally associated with children, from the gendered distribution of activity space, from the remains of children-as-apprentices, and from mortuary evidence. Baxter's work will aid archaeologists bring a more nuanced understanding of children's role in the historical and archaeological record.

An Archaeology of the Soul Jun 30 2022 The richness and the range of Native American spirituality has long been noted, but it has never been examined so thoroughly, nor with such an eye for the amazing interconnectedness of Indian tribal ceremonies and practices, as in *An Archaeology of the Soul*. In this monumental work, destined to become a classic in its field, Robert Hall traces the genetic and historical relationships of the tribes of the Midwest and Plains--including roots that extend back as far as 3,000 years. Looking beyond regional barriers, *An Archaeology of the Soul* offers new depths of insight into American Indian ethnography. Hall uncovers the lineage and kinship shared by Native North Americans through the perspectives of history, archaeology, archaeoastronomy, biological anthropology, linguistics, and mythology. The wholeness and panoramic complexity of American Indian belief has never been so fully explored--or more deeply understood.

The Archaeology of Knowledge Jan 02 2020

A Historical Archaeology of the Modern World Jul 20 2021 This unique book offers a theoretical framework for historical archaeology that explicitly relies on network theory. Charles E. Orser, Jr., demonstrates the need to examine the impact of colonialism, Eurocentrism, capitalism, and modernity on all archaeological sites inhabited after 1492 and shows how these large-scale forces create a link among all the sites. Orser investigates the connections between a seventeenth-century runaway slave kingdom in Palmares, Brazil and an early nineteenth-century peasant village in central Ireland. Studying artifacts, landscapes, and social inequalities in these two vastly different cultures, the author explores how the archaeology of fugitive Brazilian slaves and poor Irish farmers illustrates his theoretical concepts. His research underscores how network theory is largely unknown in historical archaeology and how few historical archaeologists apply a global perspective in their studies. *A Historical Archaeology of the Modern World* features data and illustrations from two previously unknown sites and includes such intriguing findings as the

provenance of ancient Brazilian smoking pipes that will be new to historical archaeologists.

The Archaeology of Tibetan Books Jan 06 2023 Agnieszka Helman-Ważny's *Archaeology of Tibetan Books* provides a comprehensive guide to the making of Tibetan books. Concerned with the relation of papers, inks, and layout to questions of provenance and dating, this work is a must-have companion to any textual analysis.

Digging the Trenches Feb 24 2022 This book shows the readers how archaeology can be used to reveal the position of trenches, dugouts, and other battlefield features as well as to rediscovering what life on the Western Front was really like.

Archaeology of the Books of Samuel Dec 05 2022 Considering the literary dimension of the earliest text history of Samuel, this volume asks the question if the comparative analysis of the textual witnesses permit proving the existence of distinct literary editions and identifying the ideological motives that governed the possible modification of the text.

The Archaeology of the Colonized Jun 06 2020 This book investigates the experience of the colonized in their landscape setting, and proposes an 'archaeology of taxation' to investigate the relationship between local community and central control.

The Birth of the Clinic Jun 18 2021 In this book Michel Foucault, one of the most influential thinkers of recent times, calls us to look critically at specific historical events in order to uncover new layers of significance. In doing so, he challenges our assumptions not only about history, but also about the nature of language and reason, even of truth. By analysing the methods of observation that underpinned the origins of modern medical techniques, Foucault is able to identify 'that opening up of the concrete individual, for the first time in Western history, to the language of rationality, that major event in the relationship of man to himself and of language to things'. The scope of such an undertaking is vast, but it is Foucault's skill that, by means of his uniquely engaging narrative style, his penetrating gaze is able to confront our own. After reading his words our perceptions are never quite the same again.

Champa and the Archaeology of Mý Sơn (Vietnam) Mar 28 2022 The kings of ancient Champa, a civilization located in the central region of today's Vietnam, started building sacred temples in a circular valley more than 1500 years ago. The monuments, now known by the Vietnamese name M? So'n, were discovered by nineteenth-century colonial soldiers and first studied by the French architect Henri Parmentier. Bombed during the Vietnam War, the ruins of the brick towers, decorated with exquisite carvings and sculptures, were designated as a UNESCO World Cultural Heritage site in 1999. An Italian team has worked at the site for the last ten years, doing archaeological research and restoration work in cooperation with Vietnamese specialists. This book is the first published volume based on their efforts. The opening section consists of historical, anthropological and architectural studies of the civilization of Champa. The remainder of the book presents an unusually intimate and extensively illustrated portrait of the archaeologists' research and restoration work at M? So'n. While this book is important for specialists and students of the history and archaeology of Champa and Southeast Asia, it also tells a fascinating story that will appeal to general readers and visitors to this exceptional archaeological site.

The Oxford Handbook of the Archaeology of the Contemporary World Oct 30 2019 It has been clear for many years that the ways in which archaeology is practised have been a direct product of a particular set of social, cultural, and historical circumstances - archaeology is always carried out in the present. More recently, however, many have begun to consider how archaeological techniques might be used to reflect more directly on the contemporary world itself: how we might undertake archaeologies of, as well as in the present. This Handbook is the first comprehensive survey of an exciting and rapidly expanding sub-field and provides an authoritative overview of the newly emerging focus on the archaeology of the present and recent past. In addition to detailed archaeological case studies, it includes essays by scholars working on the relationships of different disciplines to the archaeology of the contemporary world, including anthropology, psychology, philosophy, historical geography, science and technology studies, communications and media, ethnoarchaeology, forensic archaeology, sociology, film, performance, and contemporary art. This volume seeks to explore the boundaries of an emerging sub-discipline, to develop a tool-kit of concepts and methods which are applicable to this new field, and to suggest important future trajectories for research. It makes a significant intervention by drawing together scholars working on a broad range of themes, approaches, methods, and case studies from diverse contexts in different parts of the world, which have not previously been considered collectively.
