**When Humans Become Migrants Nov 09 2020** "The treatment of migrants is one of the most challenging issues that human rights jurisprudence faces today, as the controversies surrounding immigration often lead to practices that are at odds with the ethics of treating migrants as individuals worthy of human rights. This book examines the opposing ways in which the European Court of Human Rights and the Inter-American Court of Human Rights treat claims lodged by migrants. It combines legal, sociological, and historical analysis to show that the two courts were the product of different backgrounds, which led to differing attitudes towards migrants in their founding texts, and that these differences were reinforced in their developing case law. The book assesses the case law of both courts in detail to argue that they approach migrant cases from fundamentally different perspectives. It asserts that the European Court of Human Rights treats migrants first as aliens, and then - but only as a second step in its reasoning - as human beings. By contrast, the Inter-American Court of Human Rights approaches migrants as human beings in the first instance. When Humans Become Migrants argues that the Inter-American Court of Human Rights takes a fundamentally more human rights-driven approach to migration. It shows how these trends formed at the courts, and assesses whether their approaches have changed over time. Ultimately it asks whether the divergence in the case law of the two courts is likely to continue, and what avenues exist in order to produce a more progressive case law at Strasbourg"--Unedited summary from book jacket.

**Investment Migration Programs 2020 Apr 26 2022 Investment Migration Programs 2020 is a comprehensive, systematic analysis and benchmarking of the world's most notable investment migration programs. The publication features two indexes -- the Global Residence Program Index (GRPI) and the Global Citizenship Program Index (GCPI). Updated annually by leading academic researchers, country risk specialists, economists, independent expert immigration and citizenship lawyers, and other industry specialists, the GRPI and GCPI reflect the relative worth of reputable residence and citizenship programs around the world, respectively. The indexes are complemented by insightful expert analysis of engaging topics such as global investment migration trends, sovereign equity and the pro-growth benefits of economic migration, and facilitated naturalization, as well as pertinent prevailing issues such as due diligence and compliance, risk management, and program transparency. Investment Migration Programs 2020 is an indispensable tool for all those interested in keeping up to date with industry developments or considering investment migration as an option for opening doors to new opportunities, be they private clients and their advisors, industry professionals, or policy makers wanting to manage investment migration programs in order to achieve fiscal autonomy and economic growth.**

**The Oxford Handbook of Citizenship Jul 30 2022** Contrary to predictions that it would become increasingly redundant in a globalizing world, citizenship is back with a vengeance. The Oxford Handbook of Citizenship brings together leading experts in law, philosophy, political science, economics, sociology, and geography to provide a multidisciplinary, comparative discussion of different dimensions of citizenship: as legal status and political membership; as rights and obligations; as identity and belonging; as civic virtues and practices of engagement; and as a discourse of political and social equality or responsibility for a common good. The contributors engage with some of the oldest normative and substantive quandaries in the literature, dilemmas that have renewed salience in today's political climate. As well as setting an agenda for future theoretical and empirical explorations, this Handbook explores the state of citizenship today in an accessible and engaging manner that will appeal to a wide academic and non-academic audience. Chapters highlight variations in citizenship regimes practiced in different countries, from immigrant states to 'non-western' contexts, from settler societies to newly independent states, attentive to both migrants and those who never cross an international border. Topics include the 'selling' of citizenship, multilevel citizenship, in-between statuses, citizenship laws, post-colonial citizenship, the impact of technological change on citizenship, and other cutting-edge issues. This Handbook is the major reference work for those engaged with citizenship from a legal, political, and cultural perspective. Written by the most knowledgeable senior and emerging scholars in their fields, this comprehensive volume offers state-of-the-art analyses of the main challenges and prospects of citizenship in today's world of increased migration and globalization. Special emphasis is put on the question of whether inclusive and egalitarian citizenship can provide political legitimacy in a turbulent world of exploding social inequality and resurgent populism.

**Ius Doni Aug 07 2020** Ius doni, commonly referred to as citizenship by investment or economic citizenship, is one of the avenues of citizenship acquisition, alongside ius sanguinis, ius soli and others. It refers to the acquisition of the status of citizenship through an exceptional (economic) contribution to the issuing country, and, by extension, a contribution to the welfare, advancement and economic development of the host state. Ius doni is thus a specific sub-type of naturalization. The term ius doni was introduced by immigration and citizenship law specialist Dr. Christian H. Kälin, pioneer of the citizenship by investment industry, in his research on the topic. Dr. Kälin introduced the concept into the contemporary legal and political theory of citizenship by providing the first comprehensive analysis of the subject, discussing the historical, legal and political concepts of citizenship.--

**The Global Market for Investor Citizenship May 28 2022 This book presents a systematic study of the history, theory and policy of investor citizenship and residence programmes. It explores how states develop new rules of joining their community in response to globalisation and highlights the tension between citizenship policies aimed at migrant integration and those, such as the sale of passports, which create 'long-distance citizens'. Individual chapters offer insights in the historical relationship between citizenship, money and property; discuss arguments that support and counter the practice of the sale of citizenship; and examine the interests and strategies of the different actors—states, companies, individuals—that constitute the 'supply' and 'demand' sides of the burgeoning citizenship industry. The book provides a global overview of the market for investor citizenship as well as a separate policy analysis of the sale of citizenship and residence in the European Union.**

**At Home in Two Countries Sep 27 2019 Read Peter's Op-ed on Trump's Immigration Ban in The New York Times The rise of dual citizenship could hardly have been imaginable to a time traveler from a hundred or even fifty years ago. Dual nationality was once considered an offense to nature, an abomination on the order of bigamy. It was the stuff of titanic battles between the United States and European sovereigns. As those conflicts dissipated, dual citizenship continued to be an oddity, a condition that, if not quite freakish, was nonetheless vaguely disreputable, a status one could hold but not advertise. Even today, some Americans mistakenly understand dual citizenship to somehow be "illegal", when in fact it is completely tolerated. Only recently has the status largely shed the opprobrium to which it was once attached. At Home in Two Countries charts the history of dual citizenship from strong disfavor to general acceptance. The status has touched many; there are few Americans who do not have someone in their past or present who has held the status, if only unknowingly. The history reflects on the course of the state as an institution at the level of the individual. The state was once a jealous institution, justifiably demanding an exclusive relationship with its members. Today, the state lacks both the capacity and the incentive to suppress the status as citizenship becomes more like other forms of membership. Dual citizenship allows many to formalize sentimental attachments. For others, it's a new way to game the international system. This book explains why dual citizenship was once so reviled, why it is a fact of life after globalization, and why it should be embraced today.**

**European Citizenship after Brexit Nov 02 2022 This book is open access under a CC BY 4.0 license. This Open Access book investigates European citizenship after Brexit, in light of the functionalist theory of citizenship. No matter its shape, Brexit will impact significantly on what has been labelled as one of the major achievements of EU integration: Citizenship of the Union. For the first time an automatic and collective lapse of status is observed. It is a form of involuntary loss of citizenship en masse, imposed by the automatic workings of the law on EU citizens of exclusively British nationality. It does**

**not however create statelessness and it is likely to be tolerated under international law. This loss of citizenship is connected to a reduction of rights, affecting not solely the former Union citizens but also second country nationals in the United Kingdom and their family members. The status of European citizenship and connected rights are first presented. Chapter Two focuses on the legal uncertainty that afflicts second country nationals in the United Kingdom as well as British citizens, turning from expats to post-European third country nationals. Chapter Three describes the functionalist theory and delineates three ways in which it applies to Brexit. These three directions of inquiry are developed in the following chapters. Chapter Four focuses on the intension of Union citizenship: Which rights can be frozen? Chapter Five determines the extension of Union citizenship: Who gets to withdraw the status? The key finding is that while Member states are in principle free to revoke the status of Union citizen, former Member states are not unbounded in stripping Union citizens of their acquired territorial rights. Conclusions are drawn and policy-suggestions summed up in the final chapter.**

**Migration in Political Theory Sep 19 2021 Written by an international team of leading political and legal theory scholars whose writings have contributed to shaping the field, Migration in Political Theory presents seminal new work on the ethics of movement and membership. The volume addresses challenging and under-researched themes on the subject of migration. It debates the question of whether we ought to recognize a human right to immigrate, and whether it might be legitimate to restrict emigration. The authors critically examine criteria for selecting would-be migrants, and for acquiring citizenship. They discuss tensions between the claims of immigrants and existing residents, and tackle questions of migrant worker exploitation and responsibility for refugees. The book illustrates the importance of drawing on the tools of political theory to clarify, criticize, and challenge the current terms of the migration debate.**

**Citizenship Law in Africa Jan 30 2020 Few African countries provide for an explicit right to a nationality. Laws and practices governing citizenship leave hundreds of thousands of people in Africa without a country to which they belong. Statelessness and discriminatory citizenship practices underlie and exacerbate tensions in many regions of the continent, according to this report by the Open Society Institute. Citizenship Law in Africa is a comparative study by the Open Society Justice Initiative and Africa Governance Monitoring and Advocacy Project. It describes the often arbitrary, discriminatory, and contradictory citizenship laws that exist from state to state, and recommends ways that African countries can bring their citizenship laws in line with international legal norms. The report covers topics such as citizenship by descent, citizenship by naturalization, gender discrimination in citizenship law, dual citizenship, and the right to identity documents and passports. It describes how stateless Africans are systematically exposed to human rights abuses: they can neither vote nor stand for public office; they cannot enroll their children in school, travel freely, or own property; they cannot work for the government.--Publisher description.**

***The EU Citizenship Directive: a Commentary Dec 11 2020*** The EU Citizenship Directive defines the right of free movement for citizens of the European Economic Area. It applies to EU citizens and their family members who move to another Member State. This might at first seem like a straightforward definition, but immediately questions arise. Whodetermines if a person is an EU citizen at all? What about dual citizens of two Member States, or of one Member State and a non-Member State (a "third State")? What is the position of EU citizens who move to one Member State, and then return to their home Member State?This book provides a comprehensive commentary of the EU's Citizens' Directive tracing the evolution of the Directive's provisions, placing each article in its historical and legislative context. Special emphasis is placed on highlighting the connections and interactions between the Directive's constituent provisions so as to permit a global appreciation of the system of free movement rights to which the Directive gives effect. Each provision is annotated containing a detailed analysis of the case-law of the Court of Justice as well as of related measures impacting upon the Directive's interpretation including European Commission reports and guidelines on the Directive's implementation.This fully-updated new edition includes dscussion of relevant case law since the first edition, and has been expanded to include detailed discussion of rights of EU and UK citizens after Brexit in the withdrawal agreement.

***The EU Citizenship Directive Mar 26 2022*** This book provides a comprehensive article by article commentary of the EU's Citizenship Directive. In doing so it offers readers a "one-stop" guide to a fundamental Union legislative act that governs the right of Union citizens and their family members to travel to or take up residence in other Member States of their choosing.

***Citizenship 2.0 May 16 2021*** *Citizenship 2.0* focuses on an important yet overlooked dimension of globalization: the steady rise in the legitimacy and prevalence of dual citizenship. Demand for dual citizenship is particularly high in Latin America and Eastern Europe, where more than three million people have obtained a second citizenship from EU countries or the United States. Most citizenship seekers acquire EU citizenship by drawing on their ancestry or ethnic origin; others secure U.S. citizenship for their children by strategically planning their place of birth. Their aim is to gain a second, compensatory citizenship that would provide superior travel freedom, broader opportunities, an insurance policy, and even a status symbol. Drawing on extensive interviews and fieldwork, Yossi Harpaz analyzes three cases: Israelis who acquire citizenship from European-origin countries such as Germany or Poland; Hungarian-speaking citizens of Serbia who obtain a second citizenship from Hungary (and, through it, EU citizenship); and Mexicans who give birth in the United States to secure American citizenship for their children. Harpaz reveals the growth of instrumental attitudes toward citizenship: individuals worldwide increasingly view nationality as rank within a global hierarchy rather than as a sanctified symbol of a unique national identity. *Citizenship 2.0* sheds light on a fascinating phenomenon that is expected to have a growing impact on national identity, immigration, and economic inequality.

**Beyond Citizenship Oct 21 2021 American identity has always been capacious as a concept but narrow in its application. Citizenship has mostly been about being here, either through birth or residence. The territorial premises for citizenship have worked to resolve the peculiar challenges of American identity. But globalization is detaching identity from location. What used to define American was rooted in American space. Now one can be anywhere and be an American, politically or culturally. Against that backdrop, it becomes difficult to draw the boundaries of human community in a meaningful way. Longstanding notions of democratic citizenship are becoming obsolete, even as we cling to them. Beyond Citizenship charts the trajectory of American citizenship and shows how American identity is unsustainable in the face of globalization. Peter J. Spiro describes how citizenship law once reflected and shaped the American national character. Spiro explores the histories of birthright citizenship, naturalization, dual citizenship, and how those legal regimes helped reinforce an otherwise fragile national identity. But on a shifting global landscape, citizenship status has become increasingly divorced from any sense of actual community on the ground. As the bonds of citizenship dissipate, membership in the nation-state becomes less meaningful. The rights and obligations distinctive to citizenship are now trivial. Naturalization requirements have been relaxed, dual citizenship embraced, and territorial birthright citizenship entrenched--developments that are all irreversible. Loyalties, meanwhile, are moving to transnational communities defined in many different ways: by race, ethnicity, gender, religion, age, and sexual orientation. These communities, Spiro boldly argues, are replacing bonds that once connected people to the nation-state, with profound implications for the future of governance. Learned, incisive, and sweeping in scope, Beyond Citizenship offers a provocative look at how globalization is changing the very definition of who we are and where we belong.**

***Debating Transformations of National Citizenship Aug 19 2021 This open access book discusses how national citizenship is being transformed by economic, social and political change. It focuses on the emergence of global markets where citizenship is for sale and on how new reproduction technologies impact citizenship by descent. It also discusses the return of banishment through denationalisation of terrorist suspects, and the impact of digital technologies, such as blockchain, on the future of democratic citizenship. The book provides a wide range of views on these issues from legal scholars, political scientists, and political practitioners. It is structured as a series of four conversations in which authors respond to each other. This exchange of arguments provides unique depth to current debates about the future of citizenship.
