Who Owns the Dead? Aug 23 2021 After the 9/11 attack on the World Trade Center, Chief Medical Examiner Charles Hirsch proclaimed that his staff would do more than confirm the victims' identity. Administrative Law in a Changing State Feb 26 2022 This book of essays celebrates Mark Aronson's contribution to administrative law. The introduction comes from Justice Michael Kirby of the High Court of Australia. The essays reflect Aronson's interests in judicial review, non-judicial grievance mechanisms, problems of proof and evidence, and the boundaries of public and private law. Amongst the contributors, Peter Cane, Elizabeth Fisher, and Linda Pearson write on administrative adjudication and decision-making, Anita Stuhmcke writes on Ombudsmen, and Robin Creyke and John McMillan, the Commonwealth Ombudsman, write on charters, codes and 'soft law'. There are evaluations of the profound influence of human rights law on judicial review from the UK by Sir Jack Beatson and Thomas Poole and from Canada by David Mullan. Matthew Groves and Chief Justice James Spigelman address developing themes in judicial review, while Carol Harlow, Richard Rawlings, Michael Taggart and Janet McLean follow Aronson's interests into the private side of public law. An American perspective is added by Alfred Aman and Jack Beermann.

The Hand of Compassion Sep 11 2020 Through moving interviews with five ordinary people who rescued Jews during the Holocaust, Kristen Monroe casts new light on a question at the heart of ethics: Why do people risk their lives for strangers and what drives such moral choice? Monroe's analysis points not to traditional explanations--such as religion or reason--but to identity. The rescuers' perceptions of themselves in relation to others made their extraordinary acts spontaneous and left the rescuers no choice but to act. To turn away Jews was, for them, literally unimaginable. In the words of one German Czech rescuer, "The hand of compassion was faster than the calculus of reason." At the heart of this unusual book are interviews with the rescuers, complex human beings from all parts of the Third Reich and all walks of life: Margot, a wealthy German who saved Jews while in exile in Holland; Otto, a German living in Prague who saved more than 100 Jews and provides surprising information about the plot to kill Hitler; John, a Dutchman on the Gestapo's "Most Wanted List"; Irene, a Polish student who hid eighteen Jews in the home of the German major for whom she was keeping house; and Knud, a Danish wartime policeman who took part in the extraordinary rescue of 85 percent of his country's Jews. We listen as the rescuers themselves tell the stories of their lives and their efforts to save Jews. Monroe's analysis of these stories draws on philosophy, ethics, and political psychology to suggest why and how identity constrains our choices, both cognitively and ethically. Her work offers a powerful counterpoint to conventional arguments about rational choice and a valuable addition to the literature on ethics and moral psychology. It is a dramatic illumination of the power of identity to shape our most basic political acts, including our treatment of others. But always Monroe returns us to the rescuers, to their strong voices, reminding us that the Holocaust need not have happened and revealing the minds of the ethically exemplary as they negotiated the moral quicksand that was the Holocaust.

Avedon Nov 25 2021 Richard Avedon was arguably the world's most famous photographer - as artistically influential as he was commercially successful. Over six richly productive decades, he created landmark advertising campaigns, iconic fashion photographs (as the star photographer for Harper's Bazaar and then Vogue), groundbreaking books and unforgettable portraits of everyone who was anyone. He also went on the road to find and photograph remarkable uncelebrated faces, with an eye toward constructing a grand composite picture of America. Avedon dazzled even his most dazzling subjects. He possessed a mystique so unique it was itself a kind of genius - everyone fell under his

spell. But the Richard Avedon the world saw was perhaps his greatest creation: he relentlessly curated his reputation and controlled his image, managing to remain, for all his exposure, among the most private of celebrities. No one knew him better than Norma Stevens, who for thirty years was his business partner and closest confidant. In *Avedon: Something Personal* - equal parts memoir, biography and oral history, including an intimate portrait of the legendary Avedon studio - Stevens and co-author Steven M. L. Aronson masterfully trace Avedon's life from his birth to his death, in 2004, at the age of eighty-one, while at work in Texas for *The New Yorker* (whose first-ever staff photographer he had become in 1992). The story of his two failed marriages and the love affairs he kept hidden - Avedon was a man haunted by guilt - is told here for the first time. The book contains startlingly candid reminiscences by Mike Nichols, Calvin Klein, Claude Picasso, Renata Adler, Brooke Shields, David Remnick, Naomi Campbell, Twyla Tharp, Jerry Hall, Mikhail Baryshnikov, Bruce Weber, Cindy Crawford, Donatella Versace, Jann Wenner and Isabella Rossellini, among dozens of others. *Avedon: Something Personal* is the confiding, compelling full story of a man who for half a century was an enormous influence on both high and popular culture, on both fashion and art - to this day he remains the only artist to have had not one but two retrospectives at the Metropolitan Museum of Art during his lifetime. Not unlike Richard Avedon's own defining portraits, the book delivers the person beneath the surface, with all his contradictions and complexities, and in all his touching humanity.

Princess Margaret Apr 06 2020 Was Princess Margaret a royal rebel or the victim of an unfulfilling station? Whatever conclusion we draw, she remains arguably the most interesting member of the British royal family. As second in line to the throne for many years, Margaret was born with every possible advantage - beauty, vivacity, intelligence, wealth and position. Yet her nature, as one intimate has put it, "was to make everything go wrong." She has been described as tragic, unresolved, a royal maverick, a woman of conflict, a princess without a cause. Her private life has been racked by scandal; it has been a catalogue of unhappy, unfulfilled and unsuitable relationships. Her many good points have been submerged in an avalanche of criticism. Dauntingly royal yet defiantly unorthodox, Princess Margaret has spent the greater part of her life torn between meeting the exacting standards of the monarchy and flouting its long-established conventions. **Princess Margaret: A Biography** is the first detailed, in-depth study of this controversial figure, written by a respected royal biographer.

Social Psychology in Action May 08 2020 This timely and applied textbook brings together leading scientists to illustrate how key theories and concepts in social psychology help to predict and explain behavior, and can be successfully applied to benefit social and practical problems. It focuses on robust theories and models known for their successful applications and covers a diverse range of settings—spanning classroom interventions, health behavior, financial decision making, climate change

and much more. Each chapter comprises of a theoretical section to define the key concepts and summarize the theory, providing evidence for its reliability and limitations from basic research, as well as an application section that summarizes research in an applied context and provides details about a particular study including the respective application setting. The textbook expertly shows how theory can make meaningful predictions for real world contexts, and isn't afraid to explain the potential hurdles and pitfalls when applying a theory and its underlying set of concepts in a certain context. Crucially, this format moves towards theory testing in applied contexts, enabling a closer examination of why and under what circumstances interventions may be successful in obtaining a desired behavioral or psychological end-state. Among the topics explored: Mindset theory of action phases and if-then planning Quality of motivation in self-determination theory The focus theory of normative conduct Social identity theory and intergroup contact theory Intergroup forgiveness Social Psychology in Action is a critical resource for advanced undergraduate and graduate students in social and cultural psychology, as well as students of behavioral economics seeking to develop a deeper understanding of major theories and applications of the fields. Practitioners working in the areas of organizational behavior and management, health communication, social work, and educational science and pedagogy will also find the volume pertinent to their work.

Situations Matter Dec 15 2020 An "entertaining and engaging" exploration of the invisible forces influencing your life-and how understanding them can improve everything you do. The world around you is pulling your strings, shaping your innermost instincts and your most private thoughts. And you don't even realize it. Every day and in all walks of life, we overlook the enormous power of situations, of context in our lives. That's a mistake, says Sam Sommers in his provocative new book. Just as a museum visitor neglects to notice the frames around

paintings, so do people miss the influence of ordinary situations on the way they think and act. But frames- situations- do matter. Your experience viewing the paintings wouldn't be the same without them. The same is true for human nature. In *Situations Matter*, Sommers argues that by understanding the powerful influence that context has in our lives and using this knowledge to rethink how we see the world, we can be more effective at work, at home, and in daily interactions with others. He describes the pitfalls to avoid and offers insights into making better decisions and smarter observations about the world around us.

Management Rewired Feb 14 2021 How brain science is transforming the way we manage Why is it so hard for managers to get the results they want? According to the latest brain science, it's because most of what they do produces the opposite of what they expect. Appeals to reason fall short, for our decisions are made emotionally, and logic is at best an after-the-fact justification for what we've already determined to do. That's just one of the many amazing discoveries that explain why management is so challenging. but as Charles Jacobs explains, once we understand the lessons of neuroscience, we're able to create more powerful strategies, inspire people to maximize their potential, and overcome the biggest hurdle to improving business performance-making change stick.
