The Power of the Bull Jan 04 2023 Everyone has heard of the Minotaur in the labyrinth on Crete and many know that the Greek gods would adopt the guise of a bull to seduce mortal women. But what lies behind these legends? *The Power of the Bull* discusses mankind's enduring obsession with bulls. The bull is an almost universal symbol throughout Indo-European cultures. Bull cults proliferated in the Middle East and in many parts of North Africa, and one cult, Mithraism, was the greatest rival to Christianity in the Roman Empire. The Cults are divergent yet have certain core elements in common. Michael Rice argues that the ancient bulls were the supreme sacrificial animal. An examination of evidence from earliest prehistory onwards reveals the bull to be a symbol of political authority, sexual potency, economic wealth and vast subterranean powers. In some areas representations of the bull have varied little from earliest times, in others it has changed vastly over centuries. This volume provides a well-illustrated and accessible analysis of the exceptionally rich artistic inheritance associated with the bull.

Sorting the Beef from the Bull Aug 19 2021 Horsemeat in burgers was hard to swallow, but there are far more sinister culinary crimes afoot... Chicken eggs that haven't come from chickens, melamine in infant's milk in China, nut shells in spices – these are just some examples of the food fraud that has occurred in recent years. As our urban lifestyle takes us further and further away from our food sources, there are increasing opportunities for dishonesty, duplicity and profit-making short-cuts. Food adulteration, motivated by money, is an issue that has spanned the globe throughout human history. Whether it's a matter of making a good quality oil stretch a bit further by adding a little extra 'something' or labelling a food falsely to appeal to current consumer trends – it's all food fraud, and it costs the food industry billions of dollars each year. The price to consumers may be even higher, with some paying for these crimes with their health and, in some cases, their lives. Sorting the Beef from the Bull is a collection of food fraud tales from around the world. It explains the role of science in uncovering some of the century's biggest food scams, and explores the arms race between food forensics and fraudsters as new methods of detection spur more creative and sophisticated means of committing the crimes. This book equips us with the knowledge of what is possible in the world of food fraud and shines a light on the shady areas of our food supply system where these criminals lurk.

The Goddess and the Bull Jan 24 2022 Veteran science writer Michael Balter skillfully weaves together many threads in this fascinating book about one of archaeology's most legendary sites—Çatalhöyük. First excavated forty years ago, the site is justly revered by prehistorians, art historians, and New Age goddess worshippers alike for its spectacular finds dating almost 10,000 years ago. Archaeological maverick Ian Hodder, leader of the recent re-excavation at this Turkish mound, designated Balter as the project's biographer. The result is a skillful telling of many stories about both past and present: of the inhabitants of Neolithic Çatalhöyük and the development of human creativity and ingenuity, as revealed in the recent excavation; of James Mellaart, the original excavator, whose troubles off the mound eventually overshadowed his incisive work at the site; of Hodder and his intense, brilliant crew who marveled and squabbled over the meaning of finds in dusty trenches while attempting to reinterpret Mellaart's work; and of the recent history of the theory and methods of archaeology itself. Part story of the human past, part soap opera of modern scholarly life, part textbook on the practice of modern archaeology, this book should appeal to general readers and archaeological students alike.

How to Castrate a Bull Jan 30 2020 Dave Hitz likes to solve fun problems. He didn't set out to be a Silicon Valley icon, a business visionary, or even a billionaire. But he became all three. It turns out that business is a mosaic of interesting puzzles like managing risk, developing and reversing strategies, and looking into the future by deconstructing the past. As a founder of NetApp, a data storage firm that began as an idea scribbled on a placemat and now takes in \$4 billion a year, Hitz has seen his company go through every major cycle in business—from the Jack-of-All-Trades mentality of a start-up, through the tumultuous period of the IPO and the dot-com bust, and finally to a mature enterprise company. NetApp is one of the fastest-growing computer companies ever, and for six years in a row it has been on Fortune magazine's list of Best Companies to Work For. Not bad for a high school dropout who began his business career selling his blood for money and typing the names of diseases onto index cards. With colorful examples and anecdotes, *How to Castrate a Bull* is a story for everyone interested in understanding business, the reasons why companies succeed and fail, and how powerful lessons often come from strange and unexpected places. Dave Hitz co-founded NetApp in 1992 with James Lau and Michael Malcolm. He served as a programmer, marketing evangelist, technical architect, and vice president of engineering. Presently, he is responsible for future strategy and direction for the company. Before his career in Silicon Valley, Dave worked as a cowboy, where he got valuable management experience by herding, branding, and castrating cattle.

The Story of Ferdinand Nov 02 2022 Once upon a time in Spain, there was a little bull and his name was Ferdinand . . . Unlike all the other little bulls - who run, jump, and butt their heads together in fights - Ferdinand would rather sit under his favourite cork tree and smell the flowers. So what will happen when Ferdinand is picked for the bull fights in Madrid? Beloved all over the world for its timeless message of peace, tolerance and the courage to

be yourself, this truly classic story has never been out of print in the US since its release in 1936. Hitherto unpublished in the UK and now a major motion picture.

Buzzie and the Bull Jul 30 2022 Buzzie and the Bull chronicles a baseball year in the lives of two lifelong friends who couldn't be more different: Buzzie Bavasi, the legendary general manager of the Brooklyn and Los Angeles Dodgers, and Al "the Bull" Ferrara, bon vivant, fountain of joy, and bench player. Their 1965 baseball journey encompassed a thrilling pennant race settled on the final day of the season, a city engulfed in flames, a perfect game, and a GM who extolled his friend the Bull as a hero in May and then banished him from the team to the depths of public purgatory in July. The partnership of these two characters--the general manager who valued fearlessness above all else and the crazy player who loved living on the edge--became the embodiment of champions who never choked in the clutch. Over seventeen years, Bavasi's teams won eight pennants and four World Series titles. His approach deserves review, and his friendship with Ferrara illustrates the ground on which he staked his baseball career. The summer of 1965 proved Bavasi's thesis that champions are built on players with one core characteristic: nerves of steel. Buzzie and the Bull offers a counterpoint to

today's focus on advanced statistical analysis that may be crowding out the important work of discovering a player's unique human qualities: the intangibles. Gauge those intangibles correctly and you get an edge--and edges help win championships

The Ballerina and the Bull Feb 22 2022 Our moment has seen the resurgence of an anarchist sensibility, from the uprisings in Seattle in 1999 to the Occupy movement of 2011. Against the vacuity and drift of financialized capitalism, proclaiming there is no alternative, these insurgent movements have insisted that an alternative is possible. In *The Ballerina and the Bull* Johanna Isaacson explores the occult history of US punk, hardcore, queercore, and riot grrrl, DIY culture, and alternative subcultures to trace a new politics of expressive negation that both contests the present order and gives us a sense of the impasses of politics in an age of depoliticization. Expressive negation registers the contradictory politics at the heart of these projects: the desire for negation that must be positively expressed. Drawing on first-hand experience, interviews, and discussion of the ludic, spatial, and sexual politics of anarchist subcultures, Isaacson maps an underground utopian politics of style and develops a radically new history of the present moment.

Vishnu's Crowded Temple Jun 04 2020 As it enters its sixtieth year of independence, India stands on the threshold of superpower status. Yet India is strikingly different from all other global colossi. While it is the world's most populous democracy and enjoys the benefits of its internationally competitive high-tech and software industries, India also contends with extremes of poverty, inequality, and political and religious violence. This accessible and vividly written book presents a new interpretation of India's history, focusing particular attention on the impact of British imperialism on Independent India. Maria Misra begins with the rebellion against the British in 1857 and tracks the country's advance to the present day. India's extremes persist, the author argues, because its politics rest upon a peculiar foundation in which traditional ideas of hierarchy, difference, and privilege coexist to a remarkable degree with modern notions of equality and democracy. The challenge of India's leaders today, as in the last sixty years, is to weave together the disparate threads of the nation's ancient culture, colonial legacy, and modern experience.

Dreaming the Bull Mar 26 2022 The second part of the stunning fictionalization of the life of Britain's warrior queen, Boudica, immerses us in a world of druids and dreamers, warriors and lovers, passion and courage. Originally a trilogy, this is now a four-part series. "Boudica" means "Bringer of Victory" (from the early Celtic word "boudeg"). She was the last defender of the Celtic culture; the only woman openly to lead her warriors into battle and to stand successfully against the might of Imperial Rome -- and triumph. Book one, *Dreaming the Eagle*, took readers from Boudica's girlhood with the Eцени tribe to the climax of the two-day battle when she and her lover, Caradoc, faced the invading Romans. Believing her dead, Breaca's beloved brother, Bán, joined the Roman cause. *Dreaming the Bull*, the second book in this compelling series, continues the intertwined stories of Boudica, and Bán, now an officer in the Roman cavalry. They stand on opposite sides in a brutal war of attrition between the occupying army and the defeated tribes, each determined to see the other dead. In a country under occupation, Caradoc, lover to Breaca, is caught and faces the ultimate penalty. Only Bán has the power to save him, and Bán has spent the past ten years denying his past. Treachery divides these two; heroism brings them together again, changed out of all recognition -- but it may not be enough to heal the wounds. *Dreaming the Bull* is a heart-stopping story of war and of peace; of love, passion and betrayal; of druids and warring gods, where each life is sacred

and each death even more so; and where Breaca and Bán learn the terrible distances they must travel to fulfill their own destinies. Through the summer, Cunomar came to recognize two different kinds of warriors. The smaller group consisted of those few men and women still alive who had known his mother before the two-day battle against the invading legions. These were her friends and they called her Breaca in the way Cunomar's father and the innermost circle of the honour guard still did. The rest, who had met her only in battle or, worse, knew her only by reputation, gave the warrior's salute in a way that was subtly different and hailed her as the Boudica, bringer of victory. She didn't enjoy that, but in the short span of his life, Cunomar had watched his mother become more comfortable with name, so that it settled on her like a worn cloak and she did not stiffen at the sound of it. He had heard her use the word herself for the first time that morning as a cold dawn sharpened the air and Nemain, the moon, lowered into her bed in the mountains. Breaca had stood on the back of her mare and addressed the massed ranks of warriors and dreamers, naming them all Boudegae, bringers of victory, and swearing before them that she would fight for as long as it took to rid the land of the invader. -- from *Dreaming the Bull*
