Seeking SRE Dec 03 2020 Organizations big and small have started to realize just how crucial system and application reliability is to their business. They 've also learned just how difficult it is to maintain that reliability while iterating at the speed demanded by the marketplace. Site Reliability Engineering (SRE) is a proven approach to this challenge. SRE is a large and rich topic to discuss. Google led the way with Site Reliability Engineering, the wildly successful O'Reilly book that described Google's creation of the discipline and the implementation that's allowed them to operate at a planetary scale. Inspired by that earlier work, this book explores a very different part of the SRE space. The more than two dozen chapters in Seeking SRE bring you into some of the important conversations going on in the SRE world right now. Listen as engineers and other leaders in the field discuss: Different ways of implementing SRE and SRE principles in a wide variety of settings How SRE relates to other approaches such as DevOps Specialties on the cutting edge that will soon be commonplace in SRE Best practices and technologies that make practicing SRE easier The important but rarely explored human side of SRE David N. Blank-Edelman is the book's curator and editor.

Beyond Relief Dec 23 2019 In many countries, prolonged conflicts result in food emergencies that recur over years or even decades. Initial humanitarian relief efforts are rarely replaced by programmes that offer a longer-term perspective on food security. This book provides examples of opportunities to bridge the gap between emergency relief and longer term developmental approaches, which can help us rethink how to support food security in protracted crises. Somalia, Sudan and the Democratic Republic of Congo have all been affected by severe protracted crises. For the first time, evidence and in-depth analysis from these countries sheds light on how to support the livelihoods of local populations. Using concrete examples, Beyond Relief demonstrates how food security means different things in different contexts while also advocating a crosscutting learning process for longer-term approaches to protracted crisis. Published in association with the Food and Agriculture Organization of the United Nations.

Airline Operations and Management Oct 21 2019 Airline Operations and Management: A Management Textbook is a survey of the airline industry, mostly from a managerial perspective. It integrates and applies the fundamentals of several management disciplines, particularly economics, operations, marketing and finance, in developing the overview of the industry. The focus is on tactical, rather than strategic, management that is specialized or unique to the airline industry. The primary audiences for this textbook are both senior and graduate students of airline management, but it should also be useful to entry and junior level airline managers and professionals seeking to expand their knowledge of the industry beyond their own functional area.

The Poetry Home Repair Manual May 20 2022 Recently appointed as the new U. S. Poet Laureate, Ted Kooser has been writing and publishing poetry for more than forty years. In the pages of The Poetry Home Repair Manual, Kooser brings those decades of experience to bear. Here are tools and insights, the instructions (and warnings against instructions) that poets— aspiring or practicing— can use to hone their craft, perhaps into art. Using examples from his own rich literary oeuvre and from the work of a number of successful contemporary poets, the author schools us in the critical relationship between poet and reader, which is fundamental to what Kooser believes is poetry ’ s ultimate purpose: to reach other people and touch their hearts. Much more than a guidebook to writing and revising poems, this manual has all the comforts and merits of a long and enlightening conversation with a wise and patient old friend— a friend who is willing to share everything he ’ s learned about the art he ’ s spent a lifetime learning to execute so well.

The History and Cultural Heritage of Chinese Calligraphy, Printing and Library Work Mar 26 2020 In China the tradition of a book society is longer than anywhere else in the world. Chinese paper making, calligraphy and woodblock printing date from very early ages, but have for a very long time remained almost unknown to the Western world. At the IFLA satellite meeting “ Chinese Written and Printed Cultural Heritage and Library Work ” in Hangzhou in 2006 the richness of present day book historical research and library activities in China has been presented by more than sixty papers. This fine selection reflects the width

and depth of this extremely important and immense Chinese heritage.

The Art of Sanctions Aug 31 2020 Nations and international organizations are increasingly using sanctions as a means to achieve their foreign policy aims. However, sanctions are ineffective if they are executed without a clear strategy responsive to the nature and changing behavior of the target. In *The Art of Sanctions*, Richard Nephew offers a much-needed practical framework for planning and applying sanctions that focuses not just on the initial sanctions strategy but also, crucially, on how to calibrate along the way and how to decide when sanctions have achieved maximum effectiveness. Nephew—a leader in the design and implementation of sanctions on Iran—develops guidelines for interpreting targets' responses to sanctions based on two critical factors: pain and resolve. The efficacy of sanctions lies in the application of pain against a target, but targets may have significant resolve to resist, tolerate, or overcome this pain. Understanding the interplay of pain and resolve is central to using sanctions both successfully and humanely. With attention to these two key variables, and to how they change over the course of a sanctions regime, policy makers can pinpoint when diplomatic intervention is likely to succeed or when escalation is necessary. Focusing on lessons learned from sanctions on both Iran and Iraq, Nephew provides policymakers with practical guidance on how to measure and respond to pain and resolve in the service of strong and successful sanctions regimes.
