Precision Physical Activity and Exercise Prescriptions for Disease Prevention: The Effect of Interindividual Variability Under Different Training Approaches, Volume II Aug 23 2021 How to Prevent the Next Pandemic Mar 30 2022 From the author of the #1 New York Times best seller How to Avoid a Climate Disaster: The COVID-19 pandemic isn't over, but even as governments around the world strive to put it behind us, they're also starting to talk about what happens next. How can we prevent a new pandemic from killing millions of people and devastating the global economy? Can we even hope to accomplish this? Bill Gates believes the answer is yes, and in this book he lays out clearly and convincingly what the world should have learned from COVID-19 and what all of us can do to ward off another disaster like it. Relying on the shared knowledge of the world's foremost experts and on his own experience of combating fatal diseases through the Gates Foundation, he first helps us understand the science of infectious diseases. Then he shows us how the

nations of the world, working in conjunction with one another and with the private sector, can not only ward off another COVID-like catastrophe but also eliminate all respiratory diseases, including the flu. Here is a clarion call—strong, comprehensive, and of the gravest importance—from one of our greatest and most effective thinkers and activists.

Building from Tradition Nov 06 2022 Building from Tradition examines the recent resurgence of interest in the handmade building and the use of local and renewable materials in contemporary construction. In the past, raw materials were shaped to provide shelter and to accommodate the cultural, social, and economic needs of individuals and communities. This is still true today as architects, engineers, and builders turn once again to local resources and methods, not simply for constructing buildings, but also as a strategy for supporting social engagement, sustainable development, and cultural continuity. Building from Tradition features global case studies that allow readers to understand how building practices—developed and refined by previous generations—continue to be adapted to suit a broad range of cultural and environmental contexts. The book provides: • a survey of historical and technical information about geologic and plant-based materials such as: stone, earth, reed and grass, wood, and bamboo; • 24 detailed case studies examining the disadvantages and benefits to using traditional materials and methods and how they are currently being integrated with contemporary construction practices.

The Return of Epidemics Aug 03 2022 Historians have long recognized epidemics to be a significant, though sometimes hidden, factor in the fortunes of societies and civilizations. The study of epidemics heightens our understanding of relationships between economic systems and living conditions. It illuminates the ideologies and religious beliefs of the affected community and illustrates the efforts and inadequacies of public health systems. This investigation of the history of epidemics in various parts of Peru during the twentieth century opens up a new field for Latin American studies to include health and disease. These are important areas of the past that enable us to understand better the living conditions of people, the role of state authority and the dynamics of social movement. Marcos Cueto examines five series of epidemics: the bubonic plague of 1903-1930; the fever epidemic of 1919-1922; the typhus and small pox epidemics in the Andes; attempts to control and eradicate malaria, and the cholera epidemics of 1991. In each case he studies the biological and ecological factors that caused the outbreak, and the techniques and policies applied to fight it, together with the response of the affected society. The experience of epidemics in Peru has been cyclical. Poverty breeds disease which in turn results in further poverty. One of the aims of this study is to highlight areas of success and failure in the fight against epidemics in the hope that such awareness may help break this vicious circle.

Sex in Public Nov 13 2020 Despite decades of feminist awareness and activism, women continue to be portrayed in outdoor advertising in a limited and sexist manner. The fact that in public space audiences are exposed to such images without choice, renders the issue an important public policy concern. *Sex in Public* utilises a large outdoor

advertising data collection to examine the contemporary outdoor advertising landscape, documenting the routine portrayal of women as thin, white, young and idle. This book examines why such portrayals are concerning for feminists as well as for public policy, and explores the advertising self-regulation systems that facilitate the display of such images. This book criticises sexist outdoor advertising as a form of sexual harassment given that imagery often bearing very strong semblance to pin-ups which would be outlawed in a workplace are readily displayed in public space, reflecting a troublesome public policy double standard. Understanding sexist outdoor advertising as a form of sexual harassment is a new framework that Sex in Public offers to understand, critique and condemn such images.

Education for Sustaining Peace Through Historical Memory Oct 05 2022 This is a necessary exercise in deconstruction and reconstruction that challenges conventional and critical approaches to peace education. Schultze-Krafts new book is an impressive piece of synthesis, a personal manifesto married to a rigorous interrogation of the theoretical literature. It pushes boundaries enhancing the sustaining peace agenda. As such it deserves the critical attention of policy makers at the highest level, as well as scholar-practitioners. Paul Arthur, Professor of Politics, Ulster University, UK This impressive and valuable book delves into the intricacies, shortcomings and potential of historical memory-based approaches to peace education, unafraid of the tough questions and knowledgeably embracing complexities. Schultze-Krafts advocacy of the memory culture approach to sustainable peace pedagogy will be of great value to educators and researchers not only in Colombia but also in other countries and regions emerging from violent conflict. Eckhardt Fuchs, Leibniz Institute for Educational Media Georg Eckert Institute, Germany Schultze-Kraft vigorously addresses the concepts and practices of, and political debates on, historical memory in the midst of violent conflict, enabling us to respond to key questions about the transition to peace: how to reconstruct traumatic pasts, how to narrate them, how to process them and how to transmit them to new generations with pedagogical purposes. Offering an exploration of tools for the empowerment of communities and for the elaboration of public policies to turn the aftermath of violent conflict into an opportunity for social transformation, researchers, conflict resolution practitioners and educators will find this book particularly helpful. Gonzalo Sanchez G., Former Director of the National Historical Memory Commission, Colombia Informed by the authors long-standing fieldwork in the Global South, this open access book presents a comprehensive narrative about the relationship between peace education, historical memory and the sustaining peace agenda, advocating for the adoption of a new perspective on education for sustaining peace through historical memory. Peace education in countries wrestling with, or emerging from, violent conflict is up against major challenges. Incorporating a focus on historical memory into peace education, without losing sight of its own pitfalls, can support learners and teachers to achieve positive change at the individual as well as social and institutional levels. Historical memory-oriented peace education stands to enhance the UN-led sustaining peace agenda and the SDGs. Markus Schultze-Kraft is Professor of Political Science at the Berlin School of Economics and Law, and Arnhold Associate at the Leibniz Institute for Educational Media Georg Eckert Institute, Germany.

Determinants of Gross Human Rights Violations by State and State Sponsored Actors in Brazil, Uruguay, Chile and Argentina Apr 06 2020 This book deals with the gross human rights violations that characterized the military repression in Argentina, Brazil, Chile and Uruguay from the 1960s to the 1980s. Dr Wolfgang Heinz, the author of three of the four case studies is a German scholar. The second author, Dr Hugo Frühling, is a Chilean researcher. Both are renowned human rights specialists who have done in-depth

research on the causes of gross human rights violations in these countries. They have interviewed generals and officers directly involved in the repression. They have unearthed secret documents and, building on existing scholarship, they have managed to draw a unique picture of the mechanisms of repressive domestic social control. They have investigated international factors as well as the dynamics of the interaction between guerrilleros and urban terrorists on the one hand, and the military, the police forces and the death squads on the other. The result is a comprehensive volume, broad and comparative in scope, and written with clinical detachment but also with humanitarian sympathy for the victims of repression.

Minding the Gap Feb 03 2020 Minding the Gap argues that in today's highly competitive, global economy, all young people need a postsecondary education. Yet only one in ten students from the lowest economic quintile in the United States currently earns a postsecondary credential. This timely and instructive book from Jobs for the Future explores policies and practices that would quickly enable a larger number of low-income and first-generation college students to earn postsecondary degrees. In doing so, Minding the Gap calls for a system that thoroughly integrates secondary and postsecondary education--a system in which a college degree is the goal for all students. "Minding the Gap is an invaluable resource for policymakers and practitioners interested in eliminating the gap between secondary and postsecondary education. It focuses on those factors that must be addressed if the gap is to be eliminated: the lack of coordination between secondary and college curricula; dramatically different approaches to funding for public schools and higher education; and the lack of coordinated data systems spanning the educational continuum, from kindergarten through college. This is

a 'mustread' for all those interested in increasing the number of American college graduates." -- Freeman A. Hrabowski III, President, University of Maryland, Baltimore County "This comprehensive collection offers a bracing examination of the anachronistic divide that separates K-12 schooling and higher education, to the detriment of both. It explains how this state of affairs came about, why it's a problem, and what can be done about it. The contributors provide concrete and concise guidance on implementation, promising models, policy, data systems, and financial aid. This is an important book for educators and reformers serious about reinventing high school and tearing down the barriers to college access." -- Frederick M. Hess, Director of Education Policy Studies, American Enterprise Institute "In today's economy, a college education is a must for every citizen. *Minding the Gap* shares innovative strategies for improving the delivery system of college so it is affordable and attainable for every child in America." -- Mike Easley, Governor of North Carolina "Minding the Gap highlights the importance of raising the bar for high school and postsecondary education in the United States. Most important, it acknowledges that we must do a better job of reaching out to underserved and low-income communities to raise the educational level of their students and to provide them with the critical skills needed for the future global workforce." -- Charles B. Reed, Chancellor, California State University Edited by Nancy Hoffman, Joel Vargas, Andrea Venezia, and Marc S. Miller

Hearing Homer's Song Oct 25 2021 From the acclaimed biographer of Jane Jacobs and Srinivasa Ramanujan comes the first full life and work of arguably the most influential classical scholar of the twentieth century, who overturned long-entrenched notions of ancient epic poetry and enlarged the very idea of literature. In this literary detective story, Robert Kanigel gives us a long overdue portrait of an Oakland druggist's son who became known as the "Darwin of Homeric studies." So thoroughly did Milman Parry change our thinking about the origins of Homer's Iliad and Odyssey that scholars today refer to a "before" Parry and an "after." Kanigel describes the "before," when centuries of readers, all the way up until Parry's trailblazing work in the 1930's, assumed that the Homeric epics were "written" texts, the way we think of most literature; and the "after" that we now live in, where we take it for granted that they are the result of a long and winding oral tradition. Parry made it his life's work to develop and prove this revolutionary theory, and Kanigel brilliantly tells his remarkable story--cut short by Parry's mysterious death by gunshot wound at the age of thirty-three. From UC Berkeley to the Sorbonne to Harvard to Yugoslavia--where he traveled to prove his idea definitively by studying its traditional singers of heroic poetry--we follow Parry on his idiosyncratic journey, observing just how his early notions blossomed into a full-fledged theory. Kanigel gives us an intimate portrait of Parry's marriage to Marian Thanouser and their struggles as young parents in Paris, and explores the mystery surrounding Parry's tragic death at the Palms Hotel in Los Angeles. Tracing Parry's legacy to the modern day, Kanigel explores how what began as a way to understand the Homeric epics became the new field of "oral theory," which today illuminates everything from Beowulf to jazz improvisation, from the Old Testament to hip-hop.
