[Dancing on Ice](#) Nov 24 2021 This vintage book contains a classic guide to ice skating, concentrating on dancing and especially the waltz. The waltz is a ballroom and folk dance of German origins usually in triple time and performed primarily in closed position. This volume looks at the origin of the ice dancing, as well as popular music choices, useful information and diagrams, instructions on specific techniques, and much more. "Dancing on Ice" is highly recommended for those with an interest in ice skating and dancing, and it would make for a charming addition to collections of related literature. Contents include: "Valsing on the Ice", "Origin and Description of the Skating Valse", "The Change of Rotation", "Hints and Aids to Proficiency", "Explanatory Notes on the Points of Valsing Form", "The Black Double Wave", "Rules and Regulations for Competition in Valsing on Ice", "A Few Valses Suitable for the Ice", etc. Many vintage books such as this are becoming increasingly scarce and expensive. We are republishing this book now in an affordable, modern, high-quality edition complete with the original text and artwork.

[Holidays on Ice](#) Sep 03 2022 David Sedaris's beloved holiday collection is new again with six more pieces, including a never before published story. Along with such favorites as the diaries of a Macy's elf and the annals of two very competitive families, are Sedaris's tales of tardy trick-or-treaters ("Us and Them"); the difficulties of explaining the Easter Bunny to the French ("Jesus Shaves"); what to do when you've been locked out in a snowstorm ("Let It Snow"); the puzzling Christmas traditions of other nations ("Six to Eight Black Men"); what Halloween at the medical examiner's looks like ("The Monster Mash"); and a barnyard secret Santa scheme gone awry ("Cow and Turkey"). No matter what your favorite holiday, you won't want to miss celebrating it with the author who has been called "one of the funniest writers alive" (Economist).

[Science on Ice](#) Jan 07 2023 In Science on Ice, award-winning science broadcaster and writer Veronika Meduna follows deep-south scientists who huddle in tents and dive under ice to study ancient mud, fat fish, migrating penguins and fossilised forests. Meduna presents us with a fascinating frozen land - Antarctica's ice cap holds three quarters of the planet's fresh water, its layers of ice and sediment record past climate conditions going back millions of years, and the oceans around it drive the global food chain and a giant conveyor belt of currents that transports heat around the globe. The creatures that call Antarctica home have evolved to survive in conditions hostile to life, and the continent's permanently ice-covered lakes may even hold the secret to how life began on Earth - and what it might look like elsewhere. And though it is the only continent without permanent human habitation, Antarctica may yet hold the key to our survival. In this lavishly illustrated book Meduna introduces us to an exhilarating landscape, to fascinating discoveries and to the people making them - those scientists tackling fundamental questions about life and the world around us from the frozen continent.

[Vodka on Ice](#) Oct 24 2021 "No stranger to the Antarctic, Charles Swithinbank is the only Briton to have served with the Soviet Antarctic Expedition. From 1963 to 1965 he lived and worked without a break at Russian stations in the far south. The Cold War was in full swing and many of his colleagues assumed he had been sent to spy on them. Yet gradually the barriers were broken down and he encountered many a colorful character, gaining a fascinating insight into the lives of his Soviet comrades. Several had harrowing tales to tell. One had been a dive-bomber pilot during the war. Another had steel ribs as a legacy of the battle of Stalingrad, and had lost part of a leg during the siege of Leningrad. The doctor had been severely wounded in Stalingrad before recovering to hound the German army westwards through the Baltic States. Some of the younger Russians had spent the war in Siberia, working on state farms. In the course of his stay the author visited the coldest place on Earth, drove a giant tractor, taught English, attended Communist Party meetings and did his share of the chores. He describes feasts and everyday fare, borsch and shchi and fish buns."
