How to Give Your Users the LIS Services They Want Dec 05 2019 In these turbulent times, with the challenges of a constantly changing job market, shifting information-seeking behaviour and a vast array of new resources continually being produced, library and information services need to constantly keep one step, or more, ahead of their users. The benefits of analysing user behaviour are self-evident: better strategic planning, cost benefits and better use of budgets, better marketing, satisfied customers, satisfied management, and a library or information unit that is central to the needs of your parent organization. However, paradoxically, user needs and levels of expectation, including those of remote users, are often not fully explored. This accessible text goes back to the basics and investigates the following key issues: Why this book? Defining your users Understanding users: the what, why, where, when, how and who What is the current knowledge of user behaviour and needs: is it really predictable? Great expectations: how LIS professionals can manage and train users Using information about past user behaviour Making the most of knowing your users Keeping track of changes in what users want Tracking the future: electronic and social networking Future perfect? Readership: This book will help any library or information professional anywhere to take a fresh look at this important area and to tackle it in their organization, so as to ensure that their users will always obtain exactly what they want. Webmasters and knowledge managers will also find much to interest them.

Service, Satisfaction and Climate Jun 22 2021 Customer Service and Climate in English Language Teaching presents the results of research carried out in New Zealand to demonstrate the ways ELT can be conceptualized in terms of service and climate. Although ESL is a major worldwide service industry employing large numbers of professionals and serving millions of clients, it is an under-researched field and one that is under-represented in the management/business literature. This omission is particularly noticeable, given that ELT has its own particular themes, problems, and issues. For instance. ELT is an educational service, yet exists within a commercial context. Its clients are from different cultural and linguistic backgrounds. In many ELT contexts, the cultural and linguistic backgrounds of the service providers are different from those of the clients. Thus, the service provision has a strong cross-cultural dimension. Yet the ELT sector is largely missing from the educational and the management literature This book seeks to fill the gap through discussion of ELT as a service, issues surrounding ELT teachers as service providers, the work of ELT managers, client expectations and perceptions of ELT service, comparison of staff estimates and client ratings of service quality, and considerations of service milieu and climate in ELT centers.

Information Assurance, Security and Privacy Services Aug 01 2019 Focuses on Information Assurance, Security and Privacy Services. This book discusses Program Security, Data Security and Authentication, Internet Scourges, Web Security, Usable Security, Human-Centric Aspects, Security, Privacy and Access Control, Economic Aspects of Security, Threat Modeling, Intrusion and Response.

Homeland Security in the UK Jul 24 2021 This book is a detailed examination of whether domestic security measures are striking an appropriate balance between homeland security and civil liberties in the post-9/11 era. Professor Paul Wilkinson and the other contributors assess the nature of UK responses to terrorism by key public and private-sector bodies, highlighting how these organizations can prevent, pre-empt, counter and manage terrorist attacks by using a matrix of factors such as types of terrorist networks, tactics and targets. The volume also compares and contrasts the UK's response with cognate states elsewhere in the EU and with the USA. While improved intelligence has helped prevent a major Al Qaeda attack, the authors conclude that there is still a 'major question mark' over whether the country is adequately resourced to deal with an emergency situation, particularly in major cities other than London. The book also confirms that while the UK faces a 'real and serious' threat of terrorist attack by Al Qaeda, it is better prepared for an attack than other EU member states. Homeland Security in the UK will be essential reading for all students of terrorism studies, security studies and politics, as well as by professional practitioners and well-informed general readers.

Better Regulation Aug 05 2022 The discourse of 'Better Regulation' is a hot topic, intimately associated with the drive for cost savings and a more efficient economy. In the UK and in the EU, rule-makers have lately endeavoured to achieve a more satisfactory balance between the demands of proper protection from market failure and inequity on the one hand, and commercial freedom and the potential for innovation on the other. But who is the regulator listening to, and what effect does this have on the regulatory pattern governing the integrating EU market? What is best practice in the matter of regulatory assessment. The essays in this collection explore these and other questions and will foster greater understanding of UK and EU regulation, the accountability issues involved, and problems of enforcement. It is no coincidence that since efforts to construct a Constitution for Europe have stalled the attention of policy-makers, politicians and the business community has turned instead to the quest for Better Regulation - or perhaps, it might be said, a "Better European Union".

Health Care Financing Review Feb 28 2022

Soil Ecology and Ecosystem Services Feb 05 2020 This multi-contributor, international volume synthesizes contributions from the world's leading soil scientists and ecologists, describing cutting-edge research that provides a basis for the maintenance of soil health and sustainability. The book covers these advances from a unique perspective of examining the ecosystem services produced by soil biota across different scales - from biotic interactions at microscales to communities functioning at regional and global scales. The book leads the user towards an understanding of how the sustainability of soils, biodiversity, and ecosystem services can be maintained and how humans, other animals, and ecosystems are dependent on living soils and ecosystem services. This is a valuable reference book for academic libraries and professional ecologists worldwide as a statement of progress in the broad field of soil ecology. It will also be of interest to both upper level undergraduate and graduate students taking courses in soil ecology, as well as academic researchers and professionals in the field requiring an authoritative, balanced, and up-to-date overview of this fast expanding topic.

Service Composition for the Semantic Web Aug 13 2020 Service Composition for the Semantic Web presents an in-depth analysis of aspects related to semantic-enabled Web service modeling and composition. It also covers challenges and solutions to composing Web services on the semantic Web, and proposing a semantic framework for organizing and describing Web services. Service Composition for the Semantic Web describes composability and matching models to check whether semantic Web services can be combined together to avoid unexpected failures at run time, and a set of algorithms that automatically generate detailed descriptions of composite services from high-level specifications of composition requests. The book includes case studies in the areas of digital government and bioinformatics.

Biodiversity of Ecosystems Jun 03 2022 Biodiversity of Ecosystems gives a detailed report and extensive overview of the frontiers of pure and applied biodiversity research. Chapters address such topics as abiotic factors that affect biodiversity, the efforts of conservation and sustainability, and urban and agricultural ecosystems and include case studies about special methodical problems and research approaches.

Optical Fiber Telecommunications VB Feb 16 2021 Optical Fiber Telecommunications V (A&B) is the fifth in a series that has chronicled the progress in the research and development of lightwave communications since the early 1970s. Written by active authorities from academia and industry, this edition not only brings a fresh look to many essential topics but also focuses on network management and services. Using high bandwidth in a cost-effective manner for the development of customer applications is a central theme. This book is ideal for R&D engineers and managers, optical systems implementers, university researchers and students, network operators, and the investment community. Volume (A) is devoted to components and subsystems, including: semiconductor lasers, modulators, photodetectors, integrated photonic circuits, photonic crystals, specialty fibers, polarization-mode dispersion, electronic signal processing, MEMS, nonlinear optical signal processing, and quantum information technologies. Volume (B) is devoted to systems and networks, including:

advanced modulation formats, coherent systems, time-multiplexed systems, performance monitoring, reconfigurable add-drop multiplexers, Ethernet technologies, broadband access and services, metro networks, long-haul transmission, optical switching, microwave photonics, computer interconnections, and simulation tools. Biographical Sketches Ivan Kaminow retired from Bell Labs in 1996 after a 42-year career. He conducted seminal studies on electrooptic modulators and materials, Raman scattering in ferroelectrics, integrated optics, semiconductor lasers (DBR , ridge-waveguide InGaAsP and multi-frequency), birefringent optical fibers, and WDM networks. Later, he led research on WDM components (EDFAs, AWGs and fiber Fabry-Perot Filters), and on WDM local and wide area networks. He is a member of the National Academy of Engineering and a recipient of the IEEE/OSA John Tyndall, OSA Charles Townes and IEEE/LEOS Quantum Electronics Awards. Since 2004, he has been Adjunct Professor of Electrical Engineering at the University of California, Berkeley. Tingye Li retired from AT&T in 1998 after a 41-year career at Bell Labs and AT&T Labs. His seminal work on laser resonator modes is considered a classic. Since the late 1960s, He and his groups have conducted pioneering studies on lightwave technologies and systems. He led the work on amplified WDM transmission systems and championed their deployment for upgrading network capacity. He is a member of the National Academy of Engineering and a foreign member of the Chinese Academy of Engineering. He is a recipient of the IEEE David Sarnoff Award, IEEE/OSA John Tyndall Award, OSA Ives Medal/Quinn Endowment, AT&T Science and Technology Medal, and IEEE Photonics Award. Alan Willner has worked at AT&T Bell Labs and Bellcore, and he is Professor of Electrical Engineering at the University of Southern California. He received the NSF Presidential Faculty Fellows Award from the White House, Packard Foundation Fellowship, NSF National Young Investigator Award, Fulbright Foundation Senior Scholar, IEEE LEOS Distinguished Lecturer, and USC University-Wide Award for Excellence in Teaching. He is a Fellow of IEEE and OSA, and he has been President of the IEEE LEOS, Editor-in-Chief of the IEEE/OSA J. of Lightwave Technology, Editor-in-Chief of Optics Letters, Co-Chair of the OSA Science & Engineering Council, and General Co-Chair of the Conference on Lasers and Electro-Optics.

The 2015 Brookings Financial and Digital Inclusion Project Report Apr 08 2020 The 2015 Brookings Financial and Digital Inclusion Project (FDIP) Report and Scorecard evaluate access to and usage of affordable financial services across 21 geographically and economically diverse countries. The 2015 FDIP Report and Scorecard seek to answer a set of fundamental questions about today's global financial inclusion efforts, including: 1) Do country commitments make a difference in progress toward financial inclusion?; 2) To what extent do mobile and other digital technologies advance financial inclusion?; and 3) What legal, policy, and regulatory approaches promote financial inclusion? John D. Villasenor, Darrell M. West, and Robin J. Lewis analyzed the financial inclusion landscape in Afghanistan, Bangladesh, Brazil, Chile, Colombia, Ethiopia, India, Indonesia, Kenya, Malawi, Mexico, Nigeria, Pakistan, Peru, the Philippines, Rwanda, South Africa, Tanzania, Turkey, Uganda, and Zambia. Countries received scores and rankings based on 33 indicators spanning four dimensions: country commitment, mobile capacity, regulatory environment, and adoption of traditional and digital financial services. The authors' analysis provides several takeaways with respect to expanding financial inclusion across diverse cultural, economic, and political contexts: · Country commitment is fundamental. · Movement toward digital financial services will accelerate financial inclusion. · Geography generally matters less than policy, legal, and regulatory changes, although some regional trends in terms of financial services provision are evident. · Central banks, ministries of finance, ministries of communications, banks, nonbank financial providers, and mobile network operators play major roles in achieving greater financial inclusion. · Full financial inclusion cannot be achieved without addressing the financial inclusion gender gap. This year's Report and Scorecard are the first of a series of publications intended to provide policymakers, the private sector, nongovernmental organizations, and the general public with information that can help improve financial inclusion in these countries and around the world.

Mobile Opportunities and Applications for E-Service Innovations Nov 27 2021 Mobile technology continues to shape our society, delivering information and knowledge right to our finger tips. It is only fitting that these advancements and opportunities are applied to the area of electronic services. Mobile Opportunities and Applications for E-Service Innovations brings together different perspectives on the understanding of e-service and mobile communication, as well as their effects on the fields of marketing, management, and information systems. The growth of e-services as it relates to business –to-business, business-to-consumer, consumer-to-consumer, are essential to the interests of professionals, academics, and researchers, as well as industry consultants.

Planning the Management, Operation, and Maintenance of Irrigation and Drainage Systems Nov 03 2019 This paper provides the basis for the preparation of manuals necessary for managers and staffs to perform needed activities at the proper time. The guide provides a comprehensive list of issues that should be addressed in operation and maintenance manuals for irrigation and drainage systems, and a listing of published materials and working papers which will assist in the formulation of plans for operation and maintenance. The paper serves as a valuable tool to help improve the performance of irrigation and drainage systems and to assist managers in developing and improving effective organizations to serve water consumers better.

Regulation of Water and Wastewater Services Sep 06 2022 This book, published in collaboration with ERSAR, presents a unique account of governance and regulatory methods used by different countries, states and municipalities that will help

regulators and governments all over the world to improve their regulatory approaches. It is the first book to compile such an amount of data about regulatory processes of a wide number of countries from the five continents. It discusses how the characteristics of water and wastewater services call for regulation and how different countries apply distinct regulatory methods. By showing 18 country case-studies, the book offers an interesting perspective as the regulatory models adopted vary immensely depending on geographical location, nature and strength of institutions and governments, political ideology, features and level of development of the countries. In addition, it provides examples of best practices that may be important for policy-makers to enhance the regulatory processes adopted in each country. It looks closely at rules imposed by state and local governments concerning regulatory issues and how they are being applied. Regulation of Water and Wastewater Services covers the fundamental and practical concepts and issues regarding the regulation of water and wastewater services. It describes and compares the regulatory methods adopted in several countries and provides a global overview on regulation. There is detailed coverage of topics such as quality of service regulation, economic regulation and public service obligations. This book is suitable for regulators, academic researchers and students, consultants, operators and managers, policy-makers and other stakeholders. Improvised Explosive Devices in Iraq, 2003-09 Dec 17 2020 When fighting the insurgency in Iraq, the Coalition suffered an operational, if not strategic, surprise in the form of the IED threat. To deal with that surprise, both the United States and Australia needed to make institutional responses in a cycle that took at least 6 years. The subsequent impact of IEDs in Afghanistan suggests, in fact, that the response is still incomplete. To minimize their impact, it is critical that surprises be recognized quickly and responses initiated swiftly, especially for those in contact. It may take the appointment of new leadership to achieve the necessary impetus in the recovery. (Originally published by the Strategic Studies Institute)
