[Ontology, Conceptualization and Epistemology for Information Systems, Software Engineering and Service Science](#) Jul 19 2019 As in the previous editions, ONTOSE 2010 once again was a discussion platform for all kinds of aspects on ontologies, service sciences, information systems and software engineering. The ONTOSE 2010 proceedings reflect this open discourse and hence contain contributions on various aspects of the above-mentioned - search areas. A total of 25 contributions were received. These contributions - derwent a full peer review with at least two referees, and finally 10 papers were

presented at the Workshop and collected in these proceedings. The presentations particularly focused on enterprise and service architectures, ontology application, visualization and query expansion as well as on ontologies for services. In the area of enterprise and service architecture the paper written by Thomas Kohlborn, Christian Luebeck, Axel Korthaus, Erwin Fieft, Michael Rosemann, Christoph Riedel and Helmut Krömer outlines how relationships between services can be a basis for service bundling. The work of Remigijus Gustas describes an approach which better supports the integration of static and dynamic aspects in service architectures. The third paper by Sabine Buckl, Florian Matthes, Christopher Schulz and Christian M. Schweda addresses research questions concerning interrelating enterprise architecture (EA) (i.e., questions concerning the structure of the framework for interrelating EA, the types of relationship used, utilization of the framework for development and evolution of EA).

Beyond Repair? Sep 20 2019 Winner of the 2021 Raphael Lemkin Book Award from the Institute for the Study of Genocide? Honorable Mention, 2020 CALACS Book Prize?

Beyond Repair? explores Mayan women's agency in the search for redress for harm suffered during the genocidal violence perpetrated by the Guatemalan state in the early 1980s at the height of the thirty-six-year armed conflict. The book draws on eight years of feminist participatory action research conducted with fifty-four Q'eqchi', Kaqchikel, Chuj, and Mam women who are seeking truth, justice, and reparation for the violence they experienced during the war, and the women's rights activists, lawyers, psychologists, Mayan rights activists, and researchers who have accompanied them as intermediaries for over a decade. Alison Crosby and M. Brinton Lykes use the concept of "protagonism" to deconstruct dominant psychological discursive constructions of women as "victims," "survivors," "selves," "individuals," and/or "subjects." They argue that at different moments Mayan women have been actively engaged as protagonists in constructivist and discursive performances through which they have narrated new, mobile meanings of "Mayan woman," repositioning themselves at the interstices of multiple communities and in their pursuit of redress for harm suffered.

Jeep, Dana and Chrysler Differentials Mar 07 2021 Over the last 40 years, millions of Chrysler, AMC, and Jeep vehicles have used these differentials, propelling these high-performance vehicles to victory on the street, in drag racing, and other applications. Chrysler used the Dana 60 and BorgWarner Sure-Grip high-performance differentials in the Challenger, Charger, Barracuda, Super Bee and many other renowned Chrysler muscle cars. These differentials have been tied to historic powerhouse engines, such as the Chrysler Magnum and Hemi V8s in stock car, drag racing, and other forms of racing, making history in the process. Jeep CJs and Cherokees have used the Dana 44 and AMC 20 and put these differentials under tremendous loads, which often requires frequent rebuilds. After years of use, these differentials require rebuilding, and of course aftermarket suppliers offer ring and pinion and other parts to upgrade these axles. In this Workbench series title, the focus is on the disassembly, inspection and step-by-step rebuild of the most popular high-performance differentials. Axles and differentials are not incredibly complex components, but there are some specific steps to follow for rebuilding, upgrading, and setting them up properly, and this book demystifies the process and explains it in detail. A book dedicated to the Dana, Sure-Grip, and AMC Jeep axles has never been published before, and Mopar, Jeep and AMC enthusiasts are hungry for this information. The Dana and AMC axles should remain in wide use into the foreseeable future, and therefore there will be a consistent demand for this information. This book will also feature extensive gear and application charts, so the reader is sure to select the correct gear ratio for a particular vehicle and application. Special coverage is therefore dedicated to ring and pinion gears. In addition selecting the best aftermarket and production axle shafts is covered as well as modifying and upgrading the differential housings.

Bonded Cement-Based Material Overlays for the Repair, the Lining or the Strengthening of Slabs or Pavements Jan 25 2020 Among different approaches that can be considered for concrete rehabilitation, bonded overlays are often the most economical alternative. The primary purpose of overlays is to extend the life of the candidate structures, either by restoring the quality and integrity of the surface and/or the re-establishing or improving the load-carrying capacity. Nevertheless, the durability of bonded overlay systems still draws concerns in the technical community because of bond sustainability problems encountered in a number of cases. At this time, there is still no accepted design approach or methodology that can warrant the practitioner a successful outcome of the repair. This State-of-Art report summarizes the findings with respect to all aspects involved in the

overlaying process.
