is a reproduction of the Triumph factory workshop manual part number 99-0963/0887/4223. The original 1969 Trident workshop manual 99-0887 was updated in 1972 under part number 99-0963. A short time later, the introduction of a 5-speed gearbox (1972) and a front wheel disc brake (1973) necessitated the publication of a supplement 00-4223 which was then incorporated into the 99-0963 manual creating a single workshop manual for the 1968 through 1974 models. Unfortunately, the 99-0963 manual was also published without the 00-4223 supplement and the manual that includes the supplement can only be identified by the following notation printed to the bottom corner of the title page: 'PART NO. 99-0963 INCORPORATING 99-0887 AND SUPPLEMENT 00-4223' The difference in content between the two manuals that carry the same part number is extremely important to owners of the 5-speed and disc brake models. There were a number of 'running changes' made throughout the 6-year

production run of these models and, in order to provide information applicable to those changes, the 00-4223 supplement was either merged or appended to the end of the appropriate sections within the manual. However, it is also important to note, with regard to any maintenance and repair instructions and also the specifications in the 'General Data' (GD) section, that whenever engine numbers are stated, the data will be specific to that particular series. Therefore, the reader is encouraged to pay close attention to any engine number notations and to read the entire section plus the supplemental data prior to commencing any work. In conclusion, 750cc T150 and T150V owners are subjected to considerable confusion surrounding the appropriate selection of the multitude of originals and reprints of the various 750cc Trident manuals that have recently flooded the marketplace. However, the combination manual 99-0963/99-0887/00-4223 is the most comprehensive manual for the entire line of

750cc Trident three-cylinder motorcycles produced from 1968 through 1974, however, it is somewhat scarce and difficult to find. In addition, many of the changes made during the production run necessitate the use of this 'combination' manual and we are pleased to offer this reprint of the 99-0843/99-0948/00-4223 manual as a service to all 750cc T150, T150V owners. In addition, as the X75 Hurricane is a combination of both the Trident and the BSA Rocket 3 this manual will also be of interest to owners of that model. The models covered are: 1968 to 1970 T150 Trident 1971 to 1972 T150 Trident 1972 to 1974 T150V Trident - with 5 speed gearbox and disc front brake.

HONDA 1969-1978 WORKSHOP MANUAL 750cc SOHC 4 CYLINDER K0 K8 & F0 F3

May 18 2021 238 pages and more than 600 illustrations and charts, size 8.25 x 10.75 inches. At the time of Floyd Clymer's unexpected demise in 1970, there were a number of manuals that had been completed and were ready for publication; this Honda CB750 is one of those manuals. When the original manual was

compiled in either late 1969, or early 1970, it was only applicable to the first series of 1969/70 S.O.H.C. CB750 (Sandcast) and CB750K0 models and minor changes to these early models are noted in the text. However, detailed information on these changes (and subsequent changes) have been updated, by the addition of supplements, that cover the 1971 to 1978 CB750K (K1 K8) series plus the 1975 to 1978 CB750F (F0 F3) models. There were a number of 'running changes' made throughout the 10-year production run of these models and, in order to provide information applicable to those changes, the appropriate supplements are appended to the rear section of this manual. Prior to commencing any work the reader is encouraged to review those supplements with regard to applicable engine number notations as whenever engine numbers are stated, all specifications, maintenance and repair instructions will be specific to that particular series. Beginning in 1968 and extending through the 1975 model

year, the 'K' suffix often, but not always, changed on an annual basis. 'K0' was normally used to indicate the first model in the series with updated versions identified as K1, K2, K3 etc. While the 'K' number designations continued in use outside the USA through 1978, in September 1973, American Honda adopted a year identifier within the model number - for example; a CB750K'76 would be a 1976 USA model but in most other countries that same model would be identified as a CB750K6. Setting this potential for confusion aside, we can state that this manual covers the 1969 through 1978 S.O.H.C. CB750K and CB750F models. The CB750 was a true 'superbike' but it was also readily available and reasonably priced. After its initial launch in 1969, the CB750 remained in production (virtually unchanged) through 1978. With a 10-year production run of approximately 450,000 units, no one could have anticipated that it was destined to become a collector's item. Consequently, we are pleased to offer this

updated and expanded version of the original Floyd Clymer manual as a service to all 750cc S.O.H.C. Honda owners, enthusiasts and restorers worldwide. Finally, please note that the text in the original manual was translated from Japanese into English. Consequently, some of the phrasing, grammar, punctuation and word usage may be subtly different from that commonly used in the English language. However the information, as presented, is readily understandable. In addition, while we have done our best to identify any anomalies and errors that may have occurred during the original translation process, we are certain that we will have missed one or two and we request your indulgence in ignoring them.
