Cognition, Communication, and Romantic Relationships Jul 12 2020 Cognition, Communication, and Romantic Relationships focuses on the role of memory, communication, and social cognition in the development of romantic relationships. The authors review developmental models of communication and examine criticisms of these models. They also explore the stages through which relationships escalate and deteriorate, and consider the processes for such activities as meeting new people, dating, sexual intercourse, and terminating relationships. Differences between men and women are discussed throughout the text, in light of current research supporting systematic gender differences in how people think about romance and relationships. As an extended analysis and research review of how thinking about romance influences and is influenced by communicative processes, this text offers a deeper understanding of the cognitive and communicative factors involved in relationship processes. It is designed for use in courses on interpersonal relationships and intimate relations in social psychology, communication, counseling psychology, clinical psychology, and sociology.

Representing Difference in the Medieval and Modern Orientalist Romance Nov 08 2022 This book, the first full-length cross-period comparison of medieval and modern literature, offers cutting edge research into the textual and cultural legacy of the Middle Ages: a significant and growing area of scholarship. At the juncture of literary, cultural and gender studies, and capitalizing on a renewed interest in popular western representations of the Islamic east, this book proffers innovative case studies on representations of cross-religious and cross-cultural romantic relationships in a selection of late medieval and twenty-first century Orientalist popular romances. Comparing the tropes, characterization and settings of these literary phenomena, and focusing on gender, religion, and ethnicity, the study exposes the historical roots of current romance representations of the east, advancing research in Orientalism, (neo)medievalism and medieval cultural studies.

Fundamentally, *Representing Difference* invites a closer look at medieval and modern popular attitudes towards the east, as represented in romance, and the kinds of solutions proposed for its apparent problems.

Vive la Difference Aug 01 2019 After two decades of living in America, Guy Blaise is struck by the differences between the French and Americans approach to relationships, marriage, and chivalry. What makes French women so outspoken about receiving respect and equal rights in a country known for love and romance? And what keeps American women from demanding the same? In a collection of essays and letters, Guy, in coming from a long family line of strong women, presents his observations of cultural norms and attitudes that highlight the differences between French and American women. By exposing the American "man-code", giving advice to newlyweds, debunking stereotypes about Frenchmen, and sharing words of wisdom from French proverbs, Guy suggests that American women learn from their French sisters to strengthen their fight for equality.

These seemingly timeless genres are as popular today as ever! This book takes a closer look at the precise meanings of the terms screwball and romantic. Includes 24 black and white movie stills, countless quotations from selected films, an annotated bibliography, and a two-part filmography. Not only an informative resource for film students and scholars, but also an interesting read for film buffs.

The Acquisition of Syntax in Romance Languages Apr 08 2020 This volume includes a selection of papers that address a wide range of acquisition phenomena from different Romance languages and all share a common theoretical approach based on the Principles and Parameters theory. They favour, discuss and sometimes challenge traditional explanations of first and second language acquisition in terms of maturation of general principles universal to all languages. They all depart from the

view that language acquisition can be explained in terms of learning language specific rules, constraints or structures. The different parts into which this volume is organized reflect different approaches that current research has offered, which deal with issues of development of reflexive pronouns, determiners, clitics, verbs, auxiliaries, Inflection, wh-movement, rsumptive pronouns, topic and focus, mood, the syntax/discourse interface, topic and focus, and null arguments.

Shakespeare's Big Men May 22 2021 Shakespeare's Big Men examines five Shakespearean tragedies - Julius Caesar, Hamlet, Othello, Macbeth, and Coriolanus - through the lens of generative anthropology and the insights of its founder, Eric Gans. Generative anthropology's theory of the origins of human society explains the social function of tragedy: to defer our resentment against the "big men" who dominate society by letting us first identify with the tragic protagonist and his resentment, then allowing us to repudiate the protagonist's resentful rage and achieve theatrical catharsis. Drawing on this hypothesis, Richard van Oort offers inspired readings of Shakespeare's plays and their representations of desire, resentment, guilt, and evil. His analysis revives the universal spirit in Shakespearean criticism, illustrating how the plays can serve as a way to understand the ethical dilemma of resentment and discover within ourselves the nature of the human experience.

Dreams of Difference May 02 2022 From 1935 to 1945, the Japan Romantic School (Nihon Romanha), a group of major intellectuals and literary figures, explored issues concerning politics, literature, and nationalism in ways that still influence cultural discourse in Japan today. Kevin Doak's timely study is a broad critique of modernity in early twentieth-century Japan. He uses close readings and translations of texts and poems to suggest that the school's interest in romanticism stemmed from its attempt to surmount the "cultural crisis" of lost traditions. This attempt to overcome modernity eventually reduced the movement's earlier critical impulses to expressions of nationalist longing.

Romance Languages and Linguistic Theory 2011 May 10 2020 In 2011, the annual conference series Going Romance celebrated its 25th edition in Utrecht, the founder city of the enterprise. Since its inception in the eighties of the last century, the local initiative has developed into the major European discussion forum for research focussing on the contribution of (one of the) Romance languages to general linguistic theorizing as well as on the working out of in-depth analyses of Romance data within linguistic frameworks. The annual meeting took place on December, 8-10. The present volume is the 5th of the series *Romance Languages and Linguistic Theory* published by John Benjamins. We publish here a selected set of peer-reviewed articles bearing on topics in phonology, morphology, syntax and semantics, that represent both issues of theoretical nature as well as developments in the field of acquisition. The articles are of great interest for specialists of Romance and for general linguists appreciating parameters and/or language acquisition. Among the contributions are three papers presented by invited

speakers (Andrea Calabrese, Ricardo Etxepare and Jason Rothman), while two other very prominent Romance linguists figure as co-authors (Aafke Hulk, Luigi Rizzi).

Cultural Difference and Material Culture in Middle English Romance Oct 07 2022 This book explores how the cultural distinctions and conflicts between Anglo-Saxons and Normans originating with the Norman Conquest of 1066 prevailed well into the fourteenth century and are manifest in a significant number of Middle English romances including King Horn, Havelok the Dane, Sir Orfeo, Sir Gawain and the Green Knight, and others. Specifically, the study looks at how the material culture of these poems (architecture, battle tactic, landscapes) systematically and persistently distinguishes between Norman and Anglo-Saxon cultural identity. Additionally, it examines the influence of the English Outlaw Tradition, itself grounded in Anglo-Saxon resistance to the Norman Conquest, as expressed in specific recurring scenes (disguise and infiltration, forest exile) found in many Middle English romances. In the broadest sense, a significant number of Middle English romances, including some of the most well-read and often-taught, set up a dichotomy of two ruling houses headed by a powerful lord, who compete for power and influence. This book examines the cultural heritage behind each of these pairings to show how poets repeatedly contrast essentially Norman and Anglo-Saxon values and ruling styles.

Subverting the Family Romance Apr 20 2021 "Drawing on Habermas and Freud as well as historians of the family, Daniels takes up the case of three women novelists each writing at a key moment in the parallel development of the novel genre and the modern family. She demonstrates that these writers - confronted with ever more reified exclusion from public life, and relegated to narrowly defined domestic roles - intervened in and subverted the process in their novels. Daniels shows that women writers used the novel first to imagine different social rules that might define alternative kinship systems (Graffigny), and later to find - and create - loopholes within a firmly entrenched system of official and unofficial law (Charriere and Sand)." "Spanning a crucial period in the emergence of modernity, this interdisciplinary study addresses problems in French literary and social history, gender studies, and the history of mentalities."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. George and Lizzie have radically different understandings of what love and marriage should be. George grew up in a warm and loving family—his father an orthodontist, his mother a stay-at-home mom—while Lizzie grew up as the only child of two famous psychologists, who viewed her more as an in-house experiment than a child to love. Over the course of their marriage, nothing has changed—George is happy; Lizzie remains unfulfilled. When a shameful secret from Lizzie's past resurfaces, she'll need to face her fears in order to accept the true nature of the relationship she and George have built over a decade together. With pitch-perfect prose and compassion and humor to spare, George and Lizzie is an intimate story of new and past loves, the scars of childhood, and an imperfect marriage at its defining moments.

Parenting with Love Jun 22 2021 Parenting isn't easy. It's a lesson in patience, human behavior, and most important, it is a labor of love. In Parenting with Love, author Glenn Latham teaches parents simple and effective ways to change their own

behavior and thus create an environment in which their children will behave well. The author explains that using positive reinforcement, appropriate touch, smiles, laughter, and attentive listening can help parents avert negative reactions from their children and approach those children more wisely in times of rebellion or disobedience. The author also encourages parents to avoid parenting traps, such as criticism, sarcasm, threats, and argumentative problem solving. After all, these methods of communication tend to fail when used on anyone; and the last place a parent should fall prey to one of these traps is in his or her own home. Parenting with Love will teach parents to avoid these traps. Every parent, in fact, can benefit from this book—a book so simple that changes can be made in a day, bringing into reach every parent's ideal of a loving home. Book jacket.

European Romanticism Aug 25 2021 Romanticism was always culturally diverse. Though English-language anthologies have previously tended to see Romanticism as predominantly British, the term itself actually originated in Germany, where it became the banner of a Europe-wide movement involving the profound intellectual and aesthetic changes which we now associate with modernity. This anthology is the first to place British Romanticism within a comprehensive and multi-lingual European context, showing how ideas and writers interconnected across national and linguistic boundaries. By reprinting everything in the original languages, together with an English translation of all non-English material in parallel on the opposite page, it offers a new intellectual map of Romanticism. Material is thematically arranged as follows: - Art & Aesthetics - The Self - History - Language - Hermeneutics & Theology - Nature - The Exotic - Science While focusing on European texts, the inclusion of essays on their North American and Japanese reception means that Romanticism can be seen as a global phenomenon, influencing a surprising number of the ways in which the modern world sees itself.

Bridging Differences Jun 03 2022 Bridging Differences: Effective Intergroup Communication is based on the assumption that the processes operating when we communicate with people from other groups are the same processes operating when we communicate with people from our own groups. Author William B. Gudykunst has written this book from the perspective of "communicating with strangers" and addresses how factors related to our group memberships (e.g., inaccurate and unfavorable stereotypes of members of other cultures and ethnic groups) can cause us to misinterpret the messages we receive from members of those groups. Designed for students taking courses in Intercultural Communication or Intergroup Communication, Bridging Differences is also useful for many courses in Cultural Studies, Anthropology, Sociology, and Management.

The Psychology of Social Networking Vol.1 Mar 08 2020 Using a novel approach to consider the available literature and research, this book focuses on the psychology of social media based on the assumption that the experience of being in a social media has an impact on both our identity and social relationships. In order to "be online", an individual has to create an online presence — they have to share information about themselves online. This online self is presented in different ways, with diverse goals and aims in order to engage in different social media activities and to achieve desired outcomes. Whilst this may not be a real physical presence, that physicality is becoming increasingly replicated through photos, video, and ever-evolving ways of defining and describing the self online. Moreover, individuals are using both PC-based and mobile-based social media as well as increasingly making use of photo and video editing tools to carefully craft and manipulate their online self. This book therefore explores current debates in Cyberpsychology, drawing on the most up-to-date theories and research to explore four main aspects of the social media experience (communication, identity, presence and relationships). In doing so, it considers the interplay of different areas of psychological research with current technological and security insight into how individuals create, manipulate and maintain their online identity and relationships. The social media are therefore at the core of every chapter, with the common thread throughout being the very unique approach to considering diverse and varied online behaviours that may not have been thus far considered from this perspective. It covers a broad range of both positive and negative behaviours that have now become integrated into the daily lives of many westernised country's Internet users, giving it an appeal to both scholarly and industry readers alike.
