What We Saw Dec 11 2020 “A smart, sensitive, and gripping story about the courage it takes to do what’s right.” —Deb Caletti, National Book Award finalist Critically acclaimed memoirist Aaron Hartzler, author of *Rapture Practice*, takes an unflinching look at what happens to a small town when some of its residents commit a terrible crime. The party at John Doone's last Saturday night is a bit of a blur. Kate Weston can piece together most of the details: Stacey Stallard handing her shots, Ben Cody taking her keys and getting her home early... But when a picture of Stacey passed out over Deacon Mills's shoulder appears online the next morning, Kate suspects she doesn't have all the details. When Stacey levels charges against four of Kate's classmates, the whole town erupts into controversy. Facts that can't be ignored begin to surface, and every answer Kate finds leads back to the same questions: Who witnessed what happened to Stacey? And what responsibility do they have to speak up about what they saw? This honest, authentic debut novel—inspired by the events in the Steubenville rape case—will resonate with readers who've ever walked that razor-thin line between guilt and innocence that so often gets blurred, one text at a time.

Presidents of War May 16 2021 NEW YORK TIMES BESTSELLER • From a preeminent presidential historian comes a “superb and important” (The New York Times Book Review) saga of America’s wartime chief executives “Fascinating and heartbreaking . . . timely . . . Beschloss’s broad scope lets you draw important crosscutting lessons about presidential leadership.”—Bill Gates Widely acclaimed and ten years in the making, Michael Beschloss’s *Presidents of War* is an intimate and irresistibly readable chronicle of the Chief Executives who took the United States into conflict and mobilized it for victory. From the War of 1812 to Vietnam, we see these leaders considering the difficult decision to send hundreds of thousands of Americans to their deaths; struggling with Congress, the courts, the press, and antiwar protesters; seeking comfort from their spouses and friends; and dropping to their knees in prayer. Through Beschloss’s interviews with surviving participants and findings in original letters and once-classified national security documents, we come to understand how these Presidents were able to withstand the pressures of war—or were broken by them. *Presidents of War* combines this sense of immediacy with the overarching context of two centuries of American history, traveling from the time of our Founders, who tried to constrain presidential power, to our modern day, when a single leader has the potential to launch nuclear weapons that can destroy much of the human race. Praise for *Presidents of War* "A marvelous narrative. . . . As Beschloss explains, the greatest wartime presidents successfully leaven military action with moral concerns. . . . Beschloss’s writing is clean and concise, and he admirably draws upon new documents. Some of the more titillating tidbits in the book are in the footnotes. . . . There are fascinating nuggets on virtually every page of *Presidents of War*. It is a superb and important book, superbly rendered.”—Jay Winik, The New York Times Book Review "Sparkle and bite. . . . Valuable and engrossing study of how our chief executives have discharged the most significant of all their duties. . . . Excellent. . . . A fluent narrative that covers two centuries of national conflict.” —Richard Snow, The Wall Street Journal

and not the reverse. In *13 Things That Don't Make Sense* Michael Brooks meets thirteen modern-day anomalies that may become tomorrow's breakthroughs. Is ninety six percent of the universe missing? Creation, Evolution, and Catholicism Nov 09 2020 One reviewer called this book “fascinating, eye-opening, and often funny.” It is all of that and more. This is a book for the non-professional, that is, parents, priests, and mature students who have heard of the creation vs. evolution controversy and wonder what it has to do with Catholicism. It is also a book for anyone who has noticed that young Catholics are now leaving the Church in droves and wonders why that is happening. Why now especially? The purpose of the book is to provoke reflection on the effect of belief in evolution on Catholics, especially young Catholics. Molecules-to-man evolution—the origin of man and of all living things (with or without divine assistance) through hundreds of millions of years of the same kinds of material processes going on now—is taught to most students as a scientific fact in public and Catholic schools and by the culture at-large. Another reviewer observed that: “Because many mainstream Catholics have adopted the position that there’s ‘no contradiction’ between evolution and Catholic theology, it has become accepted to assume there are no real problems with theistic evolution. Consequently, there is little real discussion about the question, and Catholics who do not find an easy harmony between Scripture and evolution are left with little to go on. It is into this breach that Mr. McFadden steps with his book. *Creation, Evolution, and Catholicism* is dedicated to examining the concept of evolution - especially theistic but also atheistic - addressing the issue from a point of view of science but also theology. It demonstrates that the fundamental problem is that most Catholics have adopted the premises of naturalism; even when engaging the Faith with an intent to defend it, they often begin with assumptions taken from naturalism. Naturalism has become a kind of monkey on the Church’s back, related directly to a continued loss of faith. McFadden presents some convincing statistics demonstrating the relationship between acceptance of evolution and loss of faith. It is clear that just because theistic evolution “works” for some does not mean it “works” for everyone; in fact, based on the statistics McFadden presents, it does not “work” for the majority of Catholics.” The book makes three unique contributions to the creation/evolution/Catholicism literature. First, it digs into the encyclical *Humani Generis* and analyzes its teaching rather than just repeating what others have written about it. Secondly, it explains why 68% of white, non-Hispanic Catholics in the U.S. believe humans evolved from animals with or without God pulling the strings. Thirdly, in a long appendix made available to download it details the “Galileo Case” because the popular narrative of that case has made Catholics tentative about questioning the scientific consensus in areas that are incompatible with Catholic doctrines.
